

College Essay Example

Modern globalized world demands to keep the track of events, to have a keen sense of the pulse of the situation in global issues and flashpoints. To be on good terms with information and in order not to fall behind its vicious circle one should possess the skills of communication, being socio-active and re-act rapidly under the certain sudden circumstances. A noble wish to make the live easier has led to the fact that people lack time for creation and even for themselves. Nevertheless, this is just the broad sense. Every single invention is a tool to serve people. Progress as the headway of mankind does not suggest and does not explain people's degradation. Each single invention is the pure form of expression to the so-called ratio of a human being. So was the invention of photography.

What are the accomplishments and perspectives of the art of photography? What are the modern trends in photography? Is it connected to life as any other art-form? These are the objectives to be discussed further.

CRITICAL ART ESSAY

"The camera should be used for a recording of life, for rendering the very substance and quintessence of the thing itself, whether it be polished steel or palpitating flesh." (Weston)

The history of the photograph started in 1827. Since that time it has given "a new perspective on life and art". The style of photography varies since the "number of photographers is increasing" Almost two centuries have passed

Carl Whithaus,2005-04-27 This book takes on a daunting task How do writing teachers continue to work toward preparing students for academic and real world communication situations while faced with the increasing use of standardized high stakes testing Teachers need both the technical ability to deal with this reality and the ideological means to critique the information technologies and assessment methods that are transforming the writing classroom Teaching and Evaluating Writing in the Age of Computers and High Stakes Testing serves this dual need by offering a theoretical framework actual case studies and practical methods for evaluating student writing By examining issues in writing assessment ranging from

the development of electronic portfolios to the impact of state wide standards based assessment methods on secondary and post secondary courses this book discovers four situated techniques of authentic assessment that are already in use at a number of locales throughout the United States These techniques stress interacting with students as communicators using synchronous and asynchronous environments describing the processes and products of student learning rather than enumerating deficits situating pedagogy and evaluation within systems that incorporate rather than exclude local variables and distributing assessment among diverse audiences By advocating for a flexible system of communication based assessment in computer mediated writing instruction this book validates teachers and students experiences with writing and also acknowledges the real world weight of the new writing components on the SAT and ACT as well as on state mandated standardized writing and proficiency exams
