Nikon Jeff Revell,1900 Nikon s new D3100 is a perfect entry level DSLR This book is for anyone who upgrades from their point and shoot or for anyone who wants to jump into photography with the control and capabilities of a DSLR but without the high price There s the manual of course as well as competing books and while they all explain often in 400 pages what the camera can do none of them shows exactly how to use the camera to create great images This book has one goal to teach D3100 owners how to make great shots using their Nikon camera It teaches how to use the D3100 to create the type of photos that [Dslr Manual Photography Explained!](#) Aaron Chase,2014-03-04 Why would I want to use the manual mode if my camera can automatically adjust these settings for me Well for the same reason that professional photographers use manual mode Control You see when you let your camera automatically choose it s exposure settings based on the information it s sensors are giving it your camera will strive to expose the image as close to what the human eye would perceive the scene However the problem with this is not only that it sometimes gets it wrong but also that the way the eye might see a scene is many if not most times not the most beautiful interesting way to capture that scene For example if you were taking a picture of the sun at sunset your camera might automatically want to expose the image rather darkly attempting to make both sun and landscape are properly exposed Your camera does not realize that a much more interesting picture could be created if you exposed the image so that the landscape became the star of your photograph exposing it so that it being the breathtaking landscape is well lit rich and interesting Or you could use your camera s automatic setting and end up with the landscape being a too dark uninteresting blob of dirt Another reason to use your DSLR s manual setting is that of style No matter whether photography is your hobby or you are looking to become a serious photographer you will eventually develop

a style that you want your photography to look like Maybe that style is a dark and moody style or maybe it is a bright and cheerful style Regardless with manual you can control how your images feel and create a distinct and beautiful style in your images Whereas if you use the automatic setting this ability is taken away from you and you will end up looking like the hundreds of thousands of other digital camera users out there [Nikon D5500 For Dummies](#) Julie Adair King,2015-05-04
