Activity No. 02
MGS 005- Technology for School Leaders
2nd Semester, SY: 2022-2023

Name: Renan S. Tan

Date: 02/24/2023

Direction: *Discuss the following.*

- 1. What questions should teachers ask themselves when using technology in the classroom?**

Answer:

Using technology in the teaching and learning process are quite challenging, granted that all necessary input must be appropriate and teachers must be knowledgeable in terms of technology base instruction. In my perspective the following questions must be considered prior to integrating ICT in the teaching and learning process.

- What methods of instruction work best in your classroom?
- What kind of technological engagement do you currently make in the classroom?
- What are available technology based resources do you have?

- 2. As a school leader of the next generation, how can ICT help teachers improve their methods of teaching?**

Answer:

ICT in education increases student engagement and knowledge retention: Students are more focused on their work when ICT is incorporated into lessons. This is because using technology to teach the very same concepts in various ways can make learning more entertaining and fun. Technological competence, or the ability to use ICT effectively and efficiently, is therefore seen as a competitive advantage.
