

# Introduction to Economics – Ten Principles of Economics

*"Economics is the study of decision making"*

**Economics:** examining how society allocates its scarce resources

*Ex. how much should a business produce or how many employees should they hire?*

**Scarcity:** the problem of unlimited human wants and needs in a world with limited resources

## Principle 1: People Face Tradeoffs

*Sacrificing one opportunity/thing for another option (Ex. Saving money instead of shopping)*

## Principle 2: Opportunity Cost

The cost of something is what you give up to obtain it (Ex. Having a bf, cost is cannot date others)

## Principle 3: Rationality

- Rational People make decisions by evaluating costs and benefits of marginal changes / incremental (increasing by small amounts) adjustments to a plan.
- Rational people think at the margin and do their best they can to achieve objectives.

## Principle 4: People Respond To Incentives

- **Incentive:** something that motivates individual to perform (Ex. Reward and/or Punishments)
- Rational people act in response to incentives (Ex. When cigarette taxes rise, some quits smoking)

## Principle 5: Trades Benefits Everyone

- No need to be self-sufficient; people specialize in producing one good/service to exchange for other goods/serves. Countries do so similarly, often for better prices.
- Trades CAN be a win/win situation; because trades are voluntary

## Principle 6: Markets & Economic Activity

- **Market:** a group of buyers and sellers (need not be in a single location)
- Markets are usually a good way to organize economic activity:
  - ft) What goods to produce? How to produce them? How much to produce? Who gets them?
- Invisible hand works through the price system
  - ft) Interaction between buyers and sellers determine prices
  - tt) Prices reflect the value and cost of a good or service
