Spencer, David A. Macpherson, 2014-12-05 Autobiographical accounts by Nobel laureates reflect the richness and diversity of contemporary economic thought and offer insights into the creative process Lives of the Laureates offers readers an informal history of modern economic thought as told through autobiographical essays by twenty three Nobel Prize laureates in Economics The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity The accounts are accessible and engaging achieving clarity without sacrificing inherently difficult content This sixth edition adds four recent Nobelists to its pages Eric Maskin who illustrates his explanation of mechanism design with an example involving a mother a cake and two children Joseph Stiglitz who recounts his field's ideological wars linked to policy disputes Paul Krugman who describes the insights he gained from studying the model of the Capitol Hill Babysitting Coop and the recession it suffered when more people wanted to accumulate babysitting coupons than redeem them and Peter Diamond who maps his development from student to teacher to policy analyst Lives of the Laureates grows out of a continuing lecture series at Trinity University in San Antonio which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms These lectures demonstrate the

richness and diversity of contemporary economic thought The reader will find that paths cross in unexpected ways that disparate thinkers were often influenced by the same teachers and that luck as well as hard work plays a role in the process of scientific discovery The Laureates Lawrence R Klein Kenneth J Arrow Paul A Samuelson Milton Friedman George J Stigler James Tobin Franco Modigliani James M Buchanan Robert M Solow William F Sharpe Douglass C North Myron S Scholes Gary S Becker Robert E Lucas Jr James J Heckman Vernon L Smith Edward C Prescott Thomas C Schelling Edmund S Phelps Eric S Maskin Joseph E Stiglitz Paul Krugman Peter A Diamond

Investors and Markets William F. Sharpe, 2011-01-01 In Investors and Markets Nobel Prize winning financial economist William Sharpe shows that investment professionals cannot make good portfolio choices unless they understand the determinants of

asset prices But until now asset price analysis has largely been inaccessible to everyone except PhDs in financial economics In this book Sharpe changes that by setting out his state of the art approach to asset pricing in a nonmathematical form that will be comprehensible to a broad range of investment professionals including investment advisors money managers and financial analysts Bridging the gap between the best financial theory and investment practice Investors and Markets will help investment professionals make better portfolio choices by being smarter about asset prices Based on Sharpe s Princeton Lectures in Finance Investors and Markets presents a method of analyzing asset prices that accounts for the real behavior of investors Sharpe makes this technique accessible through a new one of a kind computer program available for free on his Web site at <http://www.stanford.edu/wfsharpe/apsim/index.html> that enables users to create virtual markets setting the starting conditions and then allowing trading until equilibrium is reached and trading stops Program users can then analyze the final portfolios and asset prices see expected returns and measure risk In addition to popularizing the most sophisticated form of asset price analysis Investors and Markets summarizes much of Sharpe s most important previous work and reflects a lifetime of thinking about investing by one of the leading minds in financial economics Any serious investment professional will benefit from Sharpe s unique insights

Portfolio Theory and Management H. Kent Baker,Greg Filbeck,2013-01-07 Portfolio management is an ongoing process of constructing portfolios that balances an investor s objectives with the portfolio manager s expectations about the future This dynamic process provides the payoff for investors Portfolio management evaluates individual assets or investments by their contribution to the risk and return of an investor s portfolio rather than in isolation This is called the portfolio perspective Thus by constructing a diversified portfolio a portfolio manager can reduce risk for a given level of expected return compared to investing in an individual asset or security According to modern portfolio theory MPT investors who do not follow a portfolio perspective bear risk that is not rewarded with greater expected return Portfolio diversification works best when financial markets are operating normally compared to periods of market turmoil such as the 2007 2008 financial crisis During periods of turmoil correlations tend to increase thus reducing the benefits of diversification Portfolio management today emerges as a dynamic process which continues to evolve at a rapid pace The purpose of Portfolio Theory and Management is to take readers from the foundations of portfolio management with the contributions of financial pioneers up to the latest trends emerging within the context of special topics The book includes discussions of portfolio theory and management both before and after the 2007 2008 financial crisis This volume provides a critical reflection of what worked and what did not work viewed from the perspective of the recent financial crisis Further the book is not restricted to the U S market but takes a more global focus by highlighting cross country differences and practices This 30 chapter book consists of seven sections These chapters are 1 portfolio theory and asset pricing 2 the investment policy statement and fiduciary duties 3 asset allocation and portfolio construction 4 risk management V portfolio execution monitoring and rebalancing 6 evaluating and reporting portfolio performance and 7 special topics
