

ADVANCED PLACEMENT US HISTORY

Course Description

The Advanced Placement US History course is designed to provide students with the analytical skills and factual knowledge necessary to deal critically with the problems of US History. The demands upon the students should equip them to deal with intermediate and advanced college courses. Students will learn to assess historical materials - their relevance to a given interpretive problem, their reliability and their importance. In addition, students will be asked to analyze and interpret primary sources, including documentary material, maps, statistical tables, and pictorial and graphic evidence of historical events. Students will learn to take notes from printed material, lecture and discussion, and to write historical essays. They should be able to express themselves with clarity and precision and know how to cite sources and credit the writing and ideas of others. They must be able to make connections between facts and key themes of history. The themes will include discussions of American diversity, the development of a unique American identity, the evolution of American culture, demographic changes over the course of America's history, economic trends and transformations, environmental issues, the development of political institutions and the components of citizenship, social reform movements, the role of religion in the making of the United States and its impact in a multicultural society, the history of slavery and its legacies in this hemisphere, war and diplomacy, and the place of the United States in an increasingly global arena. The course will trace these themes throughout the year, emphasizing the ways in which they are interconnected and examining the ways in which each helps to shape the changes over time that are so important to understanding United States history.

Students who undertake APUSH must be motivated to do their work and master the facts of history, so that we may discuss the relationships between background and subsequent events. This is not a course for those who do not enjoy the reading and study of history. The facts are the tools, and it is the responsibility of each student to do what is necessary to master those facts. The teacher is a facilitator and a guide.

The Source of the River Douglas S. Massey, Camille Z. Charles, Garvey Lundy, Mary J. Fischer, 2011-06-27 African Americans and Latinos earn lower grades and drop out of college more often than whites or Asians Yet thirty years after deliberate minority recruitment efforts began we still don t know why In *The Shape of the River* William Bowen and Derek Bok documented the benefits of affirmative action for minority students their communities and the nation at large But they also found that too many failed to achieve academic success In *The Source of the River* Douglas Massey and his colleagues investigate the roots of minority underperformance in selective colleges and universities They explain how such factors as neighborhood family peer group and early schooling influence the academic performance of students from differing racial and ethnic origins and differing social classes Drawing on a major new source of data the National Longitudinal Survey of Freshmen the authors undertake a comprehensive analysis of the diverse pathways by which whites African Americans Latinos and Asians enter American higher education This is the first study to document the different characteristics that students bring to campus and to trace out the influence of these differences on later academic performance They show that black and Latino students do not enter college disadvantaged by a lack of self esteem In fact overconfidence is more common than low self confidence among some minority students Despite this minority students are adversely affected by racist stereotypes of intellectual inferiority Although academic preparation is the strongest predictor of college performance shortfalls in academic preparation are themselves largely a matter of socioeconomic disadvantage and racial segregation Presenting important new findings The

Curriculum on the Edge of Survival Daniel Heller, 2012-01-12 Typically school curriculum has been viewed through the lens of preparation for the workplace or higher education both worthy objectives However this is not the only lens and perhaps not even the most powerful one to use if the goal is to optimize the educational system *Curriculum on the Edge of Survival* 2nd Edition attempts to define basic aspects of the curriculum when viewed through the larger lens of a school as the principal instrument through which we maintain an effective democracy In that case the purpose of education

is to prepare our students to take their rightful place as active members of a democracy This purpose is larger than workplace or college readiness and in fact subsumes them The second edition of Curriculum on the Edge of Survival posits four major starting points for education under the purpose of preparing students for functional membership in a democracy kindness thinking problem solving and communications These four foundational elements should be taught in every class at every level every day They form the backbone of a great educational system
