

Scarcity, Opportunity Cost and Production Possibilities Curves

Scarcity necessitates choice. Consuming or producing more of one thing means consuming or producing less of something else. The opportunity cost of using scarce resources for one thing instead of something else is often represented in graphical form as a *production possibilities curve*.

Part A

Use Figures 2.1 and 2.2 to answer these questions. Write the correct answer on the answer blanks, or underline the correct answer in parentheses.

Figure 2.1

Production Possibilities Curve 1

1. If the economy represented by Figure 2.1 is presently producing 12 units of Good B and zero units of Good A:
 - (A) The opportunity cost of increasing production of Good A from zero units to one unit is the loss of two unit(s) of Good B.
 - (B) The opportunity cost of increasing production of Good A from one unit to two units is the loss of two unit(s) of Good B.
 - (C) The opportunity cost of increasing production of Good A from two units to three units is the loss of two unit(s) of Good B.
 - (D) This is an example of (constant / increasing / decreasing / zero) opportunity cost per unit for Good A.
