## Reverse Parallel Park

**1 Find a suitable space.** This should be a space that you can get your car into without damaging anyone else's vehicle. Ideally the space should be a few meters longer than your car.

**2 Pull up as close to car 'A'** as possible and straighten up so the 2 cars are parallel to each other. Even if the cars are a different length, line up the back of your car with the back of car 'A'.

**4 Turn around and look out of the back of the car** and start reversing very slowly towards car 'B'. Do not move your wheel from it's fully turned position.

**3 Now stop and turn your steering wheel** all the way to the left. Don't move whilst you are doing this.

**5 Stop reversing** when the front right corner of car 'B' is exactly in the middle of your rear windscreen.

**6 Whilst stopped,** turn your wheel back to the middle position.

**7 Continue reversing** until your car has literally just passed car 'A'.

**8 Stop and turn your wheel** fully to the right. Don't move the car whilst you're doing this.

**9 Continue reversing slowly** towards car 'B' do not move your wheel from it's fully turned position.

**10 Once your car is parallel,** stop and turn your wheel back to the centre position.
