The truck is composed of a rising platform with forks fixed to the platform structure, which can be lifted over 1200mm. The truck is also equipped with practicable pallets, with a protective guard all around the pallet perimeter and with cabin side guards. The truck also has an Encoder, an instrument measuring how much the platform can be lifted. It can be equipped with a deceleration and stop device in order to operate in a wire-guided aisle.

The platform footboard has been designed so that, whenever a point is pressed, the sensor **"OPERATOR PRESENCE"** is activated.

Moreover, the truck is equipped with name plates located on the instrument panel and indicating the serial number and the residual capacities.
