

# DURATrax THE LEADER IN SWEET SPOT RACING

## IntelliPeak

### TWIN PULSE CHARGER

Congratulations on your purchase of the IntelliPeak Twin Pulse Charger by DuratRax! A breed apart from other chargers, it offers the ability to peak charge TWD battery packs at once. The Twin Pulse Charger is the ultimate in convenience for models which operate from two batteries simultaneously, or models who use multiple packs on a regular basis.

#### SPECIAL FEATURES

- Advanced fuzzy logic peak detector with automatic cut-off circuit featuring high efficiency P-Channel MOSFET drive transistors
-  Pulsed current to peak charge NiCd and NiMH batteries to 100%, without overheating
- Built-in Artificial Intelligence to eliminate false peaks
- AC or DC input
- Peak Charger 1 offers two fixed charge rates selectable by switch: a minimum 3.5A peak charge current for 6 cell (7.2V) or 7 cell (8.4V) sub-C size battery packs, and a 1A peak charge for 8 cell (9.6V) transmitter batteries.
- Peak Charger 2 offers a minimum 3.5A peak charge current for 6 cell (7.2V) or 7 cell (8.4V) sub-C size battery packs.
- 100mA trickle charge rates for 6 and 7 cell packs, 50mA trickle for 8 cell Tx packs.
- Two multi-function, high intensity LEDs for easy set-up
- Fused overload, thermal, and reverse polarity protection

#### IMPORTANT PRECAUTIONS

- Charge only nickel-cadmium or nickel-metal hydride rechargeable batteries. Damage may occur from other types of batteries.
- Do not use automotive type battery chargers to power the charger.
- Do not allow water, moisture or foreign objects into the charger.
- Do not cover the air intake holes on the charger. This will cause the charger to overheat.
- Do not charge batteries containing fewer than 6 cells.
- Do not leave the charger unattended while charging. **Disconnect the battery and remove input power from charger immediately if the charger becomes hot.** Allow the charger or battery to cool down before reconnecting.
- Keep out of reach of children.

The IntelliPeak Twin Pulse Charger is capable of charging both nickel-cadmium (NiCd) and nickel-metal hydride (NiMH) battery chemistries, as identified by this symbol. Look exclusively for battery chargers with this symbol to handle both NiCd and NiMH charging needs.

#### IMPORTANT CARE AND HANDLING INSTRUCTIONS FOR NIMH BATTERIES

While similar in appearance to sub-C NiCd batteries, NiMH batteries have a different internal chemistry and require a different charging method. It is important not to allow NiMH batteries to overheat while being charged. Heat can adversely affect the performance of NiMH batteries. If overheating is observed, disconnect the battery from the charger immediately. Do not deep cycle NiMH batteries. Permanent damage could result. Store NiMH packs with some voltage remaining on the cells. Use a NiMH battery pack no more than three cycles per day, with a two to three hour break in-between for cooling. More frequent use is likely to overheat the pack.

#### INPUT POWER

To use a 12V DC battery for input power, attach the red alligator clip to the positive (+) terminal on the battery, and the black alligator clip to the negative (-) terminal. It's best to use a clean DC power source whose output is filtered to remove unwanted electrical noise. To achieve the maximum potential of the Twin charger, the source battery must be capable of delivering at least 7 amps of current while maintaining 12V DC.

If using 110V AC for input power, connect the black AC plug to a regular 110V wall outlet. **Do not** connect the DC input leads to any power source simultaneously with AC input, as permanent damage to your charger may result.

#### POWER ON INDICATORS

Anytime AC or DC power is applied to the input and no load battery is present on either output, both LEDs will flash at a slow rate. This is simply to confirm that supply power is present on the input. It is not recommended to leave the IntelliPeak Twin connected to any input power for an indefinite period when loads are not present on the output. This will unnecessarily shorten the lifespan of the charger.

#### COOLING FAN

The IntelliPeak Twin charger incorporates a miniature fan to help keep all internal components cool during operation. This will help extend the service life of the charger, as well as allow the charger to function more efficiently. The fan will turn on anytime a load is present on the charger's output.

#### FUSE PROTECTION

The IntelliPeak Twin Pulse Charger is fuse protected from current overload. Replace the glass fuse only with one of the same rating (250V/3A) and size (5x20mm). **CAUTION:** Disconnect the charger from the AC power source and the load battery from the charger before replacing the fuse.

#### OUTPUT LEADS AND FUTABA TX ADAPTER

The built-in output leads have standard connectors on the end. This is for direct connection to common 6 and 7 cell R/C sub-C battery packs. An adapter cord is included for charging Futaba® transmitter batteries with the Twin charger. This adapter is designed to connect directly to Futaba transmitter charge jacks and ORIO® the output of Peak Charger 1 on the LEFT side of the charger.
