WebGL Programming Guide Kouichi Matsuda, Rodger Lea, 2013-07-04 Using WebGL you can create sophisticated interactive 3D graphics inside web browsers without plug ins WebGL makes it possible to build a new generation of 3D web games user interfaces and information visualization solutions that will run on any standard web browser and on PCs smartphones tablets game consoles or other devices WebGL Programming Guide will help you get started quickly with interactive WebGL 3D programming even if you have no prior knowledge of HTML5 JavaScript 3D graphics mathematics or OpenGL You ll learn step by step through realistic examples building your skills as you move from simple to complex solutions for building visually appealing web pages and 3D applications with WebGL Media 3D graphics and WebGL pioneers Dr Kouichi Matsuda and Dr Rodger Lea offer easy to understand tutorials on key aspects of WebGL plus 100 downloadable sample programs each demonstrating a specific WebGL topic You ll move from basic techniques such as rendering animating and texturing triangles all the way to advanced techniques such as fogging shadowing shader switching and displaying 3D models generated by Blender or other authoring tools This book won t just teach you WebGL best practices it will give you a library of code to jumpstart your own projects Coverage includes WebGL s origin core concepts features advantages and integration with other web standards How and basic WebGL functions work together to deliver 3D graphics Shader development with OpenGL ES Shading Language GLSL ES 3D scene drawing representing user views controlling space volume clipping object creation and perspective Achieving greater realism through lighting and hierarchical objects Advanced techniques object manipulation heads up displays alpha blending shader switching and more Valuable reference appendixes covering key issues ranging from coordinate systems to matrices and shader loading to web browser settings This is the newest text in the OpenGL Technical Library Addison Wesley s definitive collection of programming guides and reference manuals for OpenGL and its related technologies The Library enables programmers to gain a practical understanding of OpenGL and the other Khronos application programming libraries including OpenGL ES and OpenCL All of the technologies in the OpenGL Technical Library evolve under the auspices of the Khronos Group the industry consortium guiding the evolution of modern open standards media APIs

Interactive Television Production Mark Gawlinski, 2013-01-25 Interactive Television Production is essential reading for all broadcasting and new media professionals whether in production marketing technology business or management It will also be of interest to media students and anyone looking to get an insight into the future of television production It provides a practical step by step guide to the processes and issues involved in taking an interactive television idea through to being an operational service based on the knowledge and experience of leading interactive television producers This book can be used as a quick and easy reference guide with each chapter containing a Chapter in 30 seconds summary for easy reference or read from cover to cover Using accessible language the author provides detailed descriptions of iTV software technologies OpenTV MHEG 5 TV Navigator delivery technologies cable

satellite and terrestrial and production tools There are also entire chapters devoted to key issues like the commercial side of iTV and the latest work on usability and design The accompanying web site www.InteractiveTelevisionProduction.com contains useful links designed to help with common iTV questions and issues There are also entertaining quizzes for each chapter that let you test your knowledge of the concepts introduced in the book [Multimedia and Interactive Digital TV](#) Margherita Pagani,2003-01-01 Addressing the issues that managers in the multimedia industry have confronted while developing and implementing this innovative technology this book focuses on the latest research and findings in digital television technologies Covered are the major issues surrounding digital convergence including the digital metamarket and new digital media devices and their potential for IT convergence at the macro level Also addressed are multimedia and interactive digital television and the economic implications of these technologies Additionally the managerial implications of interactive digital television are covered including branding strategies for digital television channels and the critical role of content media management [Interactive TV Standards](#) Steven Morris,Anthony Smith-Chaigneau,2012-08-06 For any digital TV developer or manager the maze of standards and specifications related to MHP and OCAP is daunting you have to patch together pieces from several standards to gather all the necessary knowledge you need to compete worldwide The standards themselves can be confusing and contain many inconsistencies and missing pieces Interactive TV Standards provides a guide for actually deploying these technologies for a broadcaster or product and application developer Understanding what the APIs do is essential for your job but understanding how the APIs work and how they relate to each other at a deeper level helps you do it better faster and easier Learn how to spot when something that looks like a good solution to a problem really isn't Understand how the many standards that make up MHP fit together and implement them effectively and quickly Two DVB insiders teach you which elements of the standards that are needed for digital TV highlight those elements that are not needed and explain the special requirements that MHP places on implementations of these standards Once you've mastered the basics you will learn how to develop products for US European and Asian markets saving time and money By detailing how a team can develop products for both the OCAP and MHP markets Interactive TV Standards teaches you how to leverage your experience with one of these standards into the skills and knowledge needed to work with the critical related standards Does the team developing a receiver have all the knowledge they need to succeed or have they missed important information in an apparently unrelated standard Does an application developer really know how to write a reliable piece of software that runs on any MHP or OCAP receiver Does the broadcaster understand the business and technical issues well enough to deploy MHP successfully or will their project fail Increase your chances of success the first time with Interactive TV Standards *The Essential Guide to Telecommunications* Annabel Z. Dodd,2002 Covering the latest trends and technology changes this is the fully updated and revised bestselling guide to telecommunications for the nontechnical professional Includes sections on convergence globalization speech recognition and

Digital Interactive TV and Metadata Arthur Lugmayr, Samuli Niiranen, Seppo Kalli, 2013-03-09 Recent years have brought many

changes to the world of mass media The Internet and mobile communications technology have provided consumers with interactive digital services Television is catching up with this trend through the digitalization process Digital television is a hybrid platform combining elements from classical analog television and the Internet providing modern multimedia services on a familiar platform In short digital TV is a gateway to the world of interactive digital media Digital TV brings consumers into the television service arena and offers them new degrees of freedom However as the service and multimedia content types diversify and the services and their content increase television is facing many of the same challenges of complexity and information overflow faced by other digital media Metadata can handle the diverse services and content of digital TV efficiently and in a consumer friendly way Metadata means that the data are accompanied by other data which describe them As data about data meta data can provide an insight into syntactically and semantically complex data by distilling their essence to a set of simple descriptors Metadata also helps to structure and manage information in diverse settings The use of metadata in broadcast multimedia should not be restricted to being merely a tool for coping with the challenges of a complex networked multimedia environment Instead metadata offers new opportunities for the development of innovative services

Interactive TV in the UK Barbara Katz,2001-07-30 Inhaltsangabe Abstract Interactive Television iTV has been around for several decades Most people have probably heard the term before Having started in the USA with some trials it is now

conquering the UK The first interactive services on Digital TV DTV have been broadcasted 18 months ago and are continuously growing in number The four platform providers Sky NTL ONdigital and Telewest are trying to make their interactive services as appealing as possible and are of course offering new advertising opportunities for advertisers on that new medium The aims of this project are to analyse those new advertising opportunities and compare them to advertising on traditional TV and the Internet and find out whether advertising on iTV combines their strengths and overcomes some of their weaknesses In order to achieve this the literature review focuses on the identification of the strengths and weaknesses of advertising on traditional TV and the Internet and also provides a good overview over the iTV market in the UK and the current developments The UK is leading the way in the development of iTV and is even supposed to be 12 to 18 months ahead of the USA The market is highly competitive and fragmented with the four different platform providers offering three different forms of receiving DTV of which satellite is leading in the numbers of subscribers The predictions of the DTV uptake are very positive and the spendings for advertising on iTV are supposed to be tremendous within the next couple of years The results of the interviews carried out with iTV experts from the platform providers media and advertising agencies show that advertising on iTV indeed combines the strengths and overcomes some weaknesses and has the potential to be more successful than its two closest relatives Due to the fact that it is still in its infancy and companies are just starting to test this new medium and no success stories have been published so far advertising on iTV in its current form is not yet the killer application it was supposed to be and the uptake of T commerce is quite questionable as well It also becomes clear though that iTV does have a great potential and when the technology is creatively used to make ads more involving and engaging it will be big
