Readers can be programmed for read only or read/ write operation. A powerful anticollision algorithm allows up to 50 tags per second to be scanned, regardless of the number of tags in the read zone.

Intermec's Amtech Systems Division, with over a decade of success designing, producing, installing, and supporting RFID solutions worldwide, is developing a range of Intellitag 500 RFID inserts, tags, scanners, and programmer subsystems for availability beginning in 1999.

These products are available to Intermec systems integration partners in established transportation and security access RFID applications, as well as growing applications in supply chain management, retail operations, manufacturing, logistics, health care and many more.
