Sustainable Cultivated Land Use and Management Yongsheng Wang,David Lopez-Carr,Jianzhou Gong vand Jinlong Gao,2023-04-14 Journal of Environmental Science (Dhaka). ,2007 Carbon Sinks and Climate Change Colin A. G. Hunt,2009-01-01 The importance of this book lies in being one of the first comprehensive attempts to summarise major findings in the field of carbon sinks and climate change The book also deals comprehensively with the present and future role

of forests in climate change policy and practice This timely book is essential reading for policy decision makers and foresters alike Wasantha Athukorala Economic Analysis and Policy Reforestation and avoiding deforestation are methods of harnessing nature to tackle global warming the greatest challenge facing humankind In this book Colin Hunt deals comprehensively with the present and future role of forests in climate change policy and practice The author provides signposts for the way ahead in climate change policy and offers practical examples of forestry s role in climate change mitigation in both developed and tropical developing countries Chapters on measuring carbon in plantations their biodiversity benefits and potential for biofuel production complement the analysis He also discusses the potential for forestry in climate change policy in the United States and other countries where policies to limit greenhouse gas emissions have been foreshadowed The author employs scientific and socio economic analysis and lays bare the complexity of forestry markets A review of the workings of carbon markets based both on the Kyoto Protocol and voluntary participation provides a foundation from which to explore forestry s role Emphasis is placed on acknowledging how forests idiosyncrasies affect the design of markets for sequestered carbon The realization of forestry s potential in developed countries depends on the depth of cuts in greenhouse gas emissions together with in country rules on forestry An increase in funding for carbon retention in tropical forests is an immediate imperative but complexities dictate that the sources of finance will likely be dedicated funds rather than carbon markets This timely and comprehensive book will be of great value to any reader interested in climate change Policy makers within international agencies and governments academics and students in the fields of geography economics science policy forestry development studies as well as carbon market participants and forest developers in the private sector will find it especially useful
