**Information Protection Playbook** Greg Kane, Lorna Koppel, 2013-09-17. The primary goal of the Information Protection Playbook is to serve as a comprehensive resource for information protection (IP) professionals who must provide adequate information security at a reasonable cost. These functions are based on a model promoted by the Information Systems Audit and Control Association (ISACA) and validated by thousands of Certified Information Security Managers. The five functions are further broken down into a series of objectives or milestones to be achieved in order to implement an IP framework. The extensive appendices included at the end of the book make for an excellent resource for the security or IT manager building an IP program from the ground up.
