materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed, and the only guide of its kind, *Resources for Teaching Middle School Science* will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.

Neurocritical Care Board Review Asma Zakaria, Pouya Tahsili-Fahadan, 2018-12-20. Updated and expanded second edition of the singular review source for neurocritical care boards, this book contains multiple choice questions that cover the breadth of topics tested on the boards with answers and rationales for self study. The book has been completely and thoroughly revised to reflect the requirements for initial certification or recertification in Neurocritical Care with the latest findings of the most recent clinical trials in vascular neurology, neurocritical care, and critical care medicine incorporated. Organized to reflect the training curriculum and exam blueprint, the second edition now contains 740 questions addressing both neuroscience critical care and general critical care core knowledge. Detailed explanations are provided for each question along with references for further study. Case questions with angiograms, EEG, and monitoring waveforms, CT perfusion scans, and other images allow candidates to familiarize themselves with these tools that form a significant part of the exam. This book is an excellent resource not only for board preparation but for topical review for residents and fellows from all disciplines of medicine rotating in the neurocritical care unit, as it is easy to read, concise, and portable, with case examples and imaging to further guide education. Trainees taking the surgical or medicine critical care boards will also find it useful, as it covers the neurocritical care component of their board curriculums.

Key Features: Second edition of the first dedicated review book available for neurocritical care boards. Over 90 entirely new questions added to ensure coverage of the full range of topics tested on boards and essential to training in neurocritical care. Revised and updated questions, answers, and references to reflect current science and practice.
