the legendary controversy surrounding the challenge to Mendel's findings by British statistician and biologist R A Fisher In his 1936 paper *Has Mendel's Work Been Rediscovered* Fisher suggested that Mendel's data could have been falsified in order to support his expectations Fisher attributed the falsification to an unknown assistant of Mendel's At the time Fisher's criticism did not receive wide attention Yet beginning in 1964 about the time of the centenary of Mendel's paper scholars began to publicly discuss whether Fisher had successfully proven that Mendel's data was falsified Since that time numerous articles letters and comments have been published on the controversy This self contained volume includes everything the reader will need to know about the subject an overview of the controversy the original papers of Mendel and Fisher four of the most important papers on the debate and new updates by the authors of the latter four papers Taken together the authors contend these voices argue for an end to the controversy making this book the definitive last word on the subject
