

Problem 1 – Mathematics (Analytic Geometry)

Find the distance from the point (5, -3) to the line $7x - 4y - 28 = 0$.

Solution:

$$d = \frac{Ax_1 + By_1 + C_1}{\sqrt{A^2 + B^2}}$$

$$d = \frac{(-) (7x_1 - 4y_1 + 28)}{(-) \sqrt{(7)^2 + (-4)^2}}$$

$$d = \frac{7(5) - 4(-3) - 28}{\sqrt{65}}$$

$$d = 2.36$$

Problem 2 – Mathematics (Analytic Geometry)

Find the area bounded by the line $2x - y + 10 = 0$ and the coordinate axes.

Solution:

$$2x - y + 10 = 0$$

$$\begin{array}{ll} \text{when } x = 0 & y = 10 \\ & x = -5 \end{array}$$

$$A = \frac{5(10)}{2}$$

$$A = 25$$

Essential Questions For Analytic Geometry:

ESSENTIAL MATHEMATICS, EXAMPLES AND EXERCISES HECTOR NUÑEZ RODRIGUEZ, 2016-06-26 This book contains practical exercises and didactic examples ranging from arithmetic to calculus including fundamental themes of the algebra and analytic geometry It is specialized in the teaching and learning of mathematics in his book and essential levels arises from the problems detected in the knowledge of mathematics at different educational levels With the skill and judgment of the teacher the parent or student this material can be a useful and valuable tool in the rapprochement and gradual mastery of relevant and be mesmerized field of mathematics With math everything nothing without mathematics it could be the human world he has created and developed the mathematical knowledge as a tool or a key device in the civilizing technological work motto Mathematical knowledge is also a tool to challenge and intellectual growth invaluable in the development of the most important brain cognitive abilities **Basic Questions on Truth** P. Weingartner, 2012-12-06

The task of the book is not to give a survey of the main theories on truth found in the literature There are several books available which do this The one of David for Deflationist and Disquotational Theories of Truth that of Chapuis for Revision Theories of Truth that of Kirkham for Correspondence Theories and several others that of Rescher for Coherence Theories of Truth Moreover the book is not an analysis just of Tarski's theory like that of Moreno or the respective chapters in Kirkham though Tarski's theory plays an important role in the whole work presented The task of the book is to give a detailed answer to some basic questions on truth which have been perennial problems through the centuries and are still discussed today The answer is given in the light of our knowledge today and with the help of modern logic But the book explicitly aims at connecting recent problems with related ones in the whole history of philosophy The method to incorporate important philosophers of the tradition into the analysis is that of disputation i.e. of putting some of their main thesis into objections or counterobjections pro or contra a positive answer to the respective question After the pros and cons are given a detailed answer to the question is proposed and finally commentaries and corrections are given to the objections and counterobjections in the light of the proposed answer The Essential Comte (RLE Social Theory) Stanislaw

Andreski, 2014-08-21 Auguste Comte proclaimed himself the founder of sociology and on the whole this claim is accepted His most important work is the six volume Cours de Philosophie Positive of which this present book is a selective abridgement Comte as this selection shows was a methodological visionary He was an eminently successful terminological innovator and to him we owe not only sociology and positivism but also biology and altruism Professor Andreski in his lucid introduction assesses Comte's place under six headings as scientist philosopher sociological theorist sociological historian reformer and methodologist But this selection from Comte's works will be most welcomed because it provides a modern English translation of the main body of his thought **Epistemological Writings** H. von Helmholtz, 2012-12-06 1977 Hermann von Helmholtz

in the History of Scientific Method In 1921 the centenary of Helmholtz's birth Paul Hertz a physicist and Moritz Schlick a

philosopher published a selection of his papers and lectures on the philosophical foundations of the sciences under the title *Schriften zur Erkenntnistheorie* Combining qualities of respect and criticism that Helmholtz would have demanded Hertz and Schlick scrupulously annotated the texts Their edition of Helmholtz was of historical influence comparable to the influence among contemporary mathematicians and philosophers of Hermann Weyl's annotated edition in 1919 of Riemann's great dissertation of 1854 on the foundations of geometry For several reasons we are pleased to be able to bring this Schlick Hertz edition to the English reading world first and primary to honor the memory of Hermann von Helmholtz second as writings of historical value to deepen the understanding of mathematics and the natural sciences as well as of psychology and philosophy in the 19th century for Helmholtz must be comprehended within at least that wide a range third with Schlick to understand the developing empiricist philosophy of science in the early 20th century and fourth to bring the contributions of Schlick Hertz and Helmholtz to methodological debate in our own time a half century later long after the rise and consolidation of logical empiricism the explosion of physics since Planck and Einstein and the development of psychology since Freud and Pavlov

The national question Ramón Pineda Gómez, 2023-11-29 Before the rise of republics relations between communities were religious and military power based on the rights of the gods and spiritual warfare The Sublime Powers Granted to the Elect of the Deities With the appearance of the Republics and the Free Man International Relations as we know them today began the interaction between the National States with equal culture or legal society independence and sovereignty The right to war disappears no Republic establishes the law of war to destroy another nation The world of nations originated and consolidated in the American continent during the seventeenth and eighteenth centuries For the other continents the process began in Europe's First World War and extended to Asia and Africa during the Second World War and the Cold War But even today religious empires defend themselves by creating wars within republics and supported by monarchies and spiritual states Freedom of worship is established in the Republics to end servitude no more servants of religion who persecute condemn and subjugate peoples in the name of the gods Faith ceases to be an obligation and becomes an option In the Republic you can be an atheist during work hours a worshipper of Venus at lunch a priest of Bacchus and Morpheus at night and a worshipper of Hu tzi p chti during a sporting event and no civil authority can judge you for changing religion or prioritizing science over mythologies In contrast to natural rights republics establish citizen and social rights with Constitutions Nature does not grant any rights The creation of the Free Man in the American continent gave good results that inspired European intelligence to create great cosmogonies such as Marxism and liberalism But religious empires remain a factor of control and domination they have no legal personality do not pay taxes have their own rules and demand tribute from their faithful

Learning Basic Calculus Alexander Hahn,1998 This introductory calculus text was developed by the author through his teaching of an honors calculus course at Notre Dame The book develops calculus as well as the necessary trigonometry and analytic geometry from within the relevant historical context and yet it is not a textbook in the history of mathematics as such The notation is modern and the material is selected to cover the basics of the subject Special emphasis is placed on pedagogy throughout While emphasizing the broad applications of the subject emphasis is placed on the mathematical content of the subject
