*Ghana* Michael Asiedu Gyensare,2016-07-20 Master s Thesis from the year 2013 in the subject Leadership and Human Resources Miscellaneous grade A University of Ghana Legon University of Ghana Business School course MPhil Human Resource Management language English abstract The study examined the relationship among antecedents employee turnover intention and outcome variables First it was proposed that pay satisfaction job satisfaction affective commitment transformational leadership transactional leadership psychological climate normative commitment and continuance commitment would antecede employee turnover intention Next turnover intention was expected to influence perceptions of absenteeism Finally thoughts of quitting was presented as a moderator between turnover intention and absenteeism as acceptable or accountable work behaviour A nonexperimental cross sectional descriptive correlational design was adopted for the study Also the multi stage sampling method was used to select the three hundred and forty 340 employees who completed the survey instrument Hypotheses were tested through correlational and hierarchical regression analytic procedures The antecedent variables were all significant and inversely related to employee turnover intention and employee

turnover intention on the other hand was also significantly related to acceptable absence legitimacy. However, for the turnover intention model, the hierarchical regression analysis results indicated that affective commitment, normative commitment, pay satisfaction, job satisfaction, and transformational leadership predicted employees' intention to quit. For the absenteeism model, the hierarchical regression analysis results showed that turnover intention did not influence employees' perception of acceptable and accountable absence legitimacy, and thoughts of quitting did not also moderate the postulated relationship. It was concluded that management in the SLCs should pay utmost attention to employees' pay satisfaction, job satisfaction, affective commitment, normative commitment, and transformational leadership in order to lessen or completely eliminate the high turnover rate in the NBFIs.
