Preparing for Life in a Digital Age Julian Fraillon, John Ainley, Wolfram Schulz, Tim Friedman, Eveline Gebhardt, 2014-12-13 Ability to use information and communication technologies ICT is an imperative for effective participation in today's digital age. Schools worldwide are responding to the need to provide young people with that ability. But how effective are they in this regard? The IEA International Computer and Information Literacy Study (ICILS) responded to this question by studying the extent to which young people have developed computer and information literacy (CIL), which is defined as the ability to use computers to investigate, create and communicate with others at home, school, the workplace and in society. The study was conducted under the auspices of the International Association for the Evaluation of Educational Achievement (IEA) and builds on a series of earlier IEA studies focusing on ICT in education. Data were gathered from almost 60 000 Grade 8 students in more than 3 300 schools from 21 education systems. This information was augmented by data from almost 35 000 teachers in those schools and by contextual data collected from school ICT coordinators, school principals and the ICILS national research centers. The IEA ICILS team systematically investigated differences among the participating countries in students' CIL outcomes, how participating countries were providing CIL-related education, and how confident teachers were in using ICT in their pedagogical practice. The team also explored differences within and across countries with respect to relationships between CIL education outcomes and student characteristics and school contexts. In general, the study findings presented in this international report challenge the notion of young people as digital natives with a self-developed capacity to use digital technology. The large variations in CIL proficiency within and across the ICILS countries suggest it is naive to expect young people to develop CIL in the absence of coherent learning programs. Findings also indicate that system and school level planning needs to focus on increasing teacher expertise in using ICT for pedagogical purposes if such programs are to have the desired effect. The report furthermore presents an empirically derived scale and description of CIL learning that educational stakeholders can reference when deliberating about CIL education and use to monitor change in CIL over time. *Technology Enhanced Assessment* Desirée Joosten-Ten Brinke, Mart Laanpere, 2017-05-11 This book constitutes the proceedings of the 19th International Conference on Technology Enhanced Assessment (TEA 2016) held in Tallinn, Estonia, in October 2016. The 16 full papers presented were carefully selected from 38 submissions. They are centered around topics like measurement of higher order skills, collaborative problem solving or presentation skills, the development of guidelines for authentication, control, the role of self-assessment. **IEA International Computer and Information Literacy Study 2018 Assessment Framework** Julian Fraillon, John Ainley, Wolfram Schulz, Daniel Duckworth, Tim Friedman, 2019-07-02 This open access book presents the assessment framework for IEA's International Computer and Information Literacy Study (ICILS) 2018, which is designed to assess how well students are prepared for study work and life in a digital world. The study measures international differences in students' computer and information literacy (CIL), their ability to

use computers to investigate create participate and communicate at home at school in the workplace and in the community Participating countries also have an option for their students to complete an assessment of computational thinking CT The ICILS assessment framework articulates the basic structure of the study providing a description of the field and the constructs to be measured This book outlines the design and content of the measurement instruments sets down the rationale for those designs and describes how measures generated by those instruments relate to the constructs Hypothesized relations between constructs provide the foundation for some of the analyses that follow Above all the framework links ICILS to other similar research enabling the contents of this assessment framework to combine theory and practice in an explication of both the what and the how of ICILS

Blaming the Poor Susan D. Greenbaum,2015-07-01 In 1965 the late Senator Daniel Patrick Moynihan then a high ranking official in the Department of Labor sparked a firestorm when he released his report The Negro Family which came to be regarded by both supporters and

detractors as an indictment of African American culture Blaming the Poor examines the regrettably durable impact of the Moynihan Report for race relations and social policy in America challenging the humiliating image the report cast on poor black families and its misleading explanation of the causes of poverty A leading authority on poverty and racism in the United States Susan D Greenbaum dismantles Moynihan s main thesis that the so called matriarchal structure of the African American family feminized black men making them inadequate workers and absent fathers and resulting in what he called a tangle of pathology that led to a host of ills from teen pregnancy to adult crime Drawing on extensive scholarship Greenbaum highlights the flaws in Moynihan s analysis She reveals how his questionable ideas have been used to redirect blame for substandard schools low wages and the scarcity of jobs away from the societal forces that cause these problems while simultaneously reinforcing stereotypes about African Americans Greenbaum also critiques current policy issues that are directly affected by the tangle of pathology mindset the demonization and destruction of public housing the criminalization of black youth and the continued humiliation of the poor by entrepreneurs who become rich consulting to teachers non profits and social service personnel A half century later Moynihan s thesis remains for many a convenient justification for punitive measures and stingy indifference to the poor Blaming the Poor debunks this infamous thesis proposing instead more productive and humane policies to address the enormous problems facing us today
