Reeves, 2001 Easy to use reference book with clear answers to today s most frequently asked questions in education today **Focus** Michael J. Schmoker, 2011 The introduction states T he only reason our schools haven t made astonishing progress in the last 30 years of reform is quite simple very few schools ever implemented what is essential the most powerful simple actions and structures that woulddramatically increase the proportion of students

prepared for college or careers What is essential for schools Three simple things reasonably coherent curriculum what we teach sound lessons how we teach and far more purposeful reading and writing in every discipline or authentic literacy integral to both what and how we teach *Accelerating Student and Staff Learning* Kay Psencik, 2009-02-27 This book brings new focus to the rich history of ideas and strategies shown to improve student learning helping educators at all levels see not only the value of using proven strategies but the importance of integrating those strategies into purposeful improvement efforts Thomas R Guskey Distinguished Service Professor Georgetown College This is a book of action The author calls for leaders in school communities to be bold courageous committed and aggressive in the actions required to achieve desired increases in student learning Charles Patterson Educational Consultant Former President Association for Supervision and Curriculum Development Dramatically raise student achievement by engaging educators in collaborative curriculum design and professional development Teachers teacher leaders principals and staff developers can build a collaborative culture and improve staff and student performance with this content focused step by step model that ties curriculum design to teacher growth Kay Psencik provides a powerful process whereby teachers work together in teams to examine standards gain a deep understanding of content create curriculum maps and design common formative assessments Professional development leaders can inspire and challenge teachers to Confront assumptions about learning and professional development Clarify and establish complex standards Embed conversations about the curriculum into daily work With hands on tools templates and resources readers can help teachers become more skilled in their instruction create a school based curriculum that is tied to standards and accelerate the learning of both students and staff **Results Now** Mike Schmoker, 2006-06-30 According to author Mike Schmoker there is a yawning gap between the most well known essential practices and the reality of most classrooms This gap persists despite the hard often heroic work done by many teachers and administrators Schmoker believes that teachers and administrators may know what the best practices are but they aren't using them or reinforcing them consistently He asserts that our schools are protected by a buffer a protective barrier that prevents scrutiny of instruction by outsiders The buffer exists within the school as well Teachers often know only what is going on in their classrooms and they may be completely in the dark about what other teachers in the school are doing Even principals says Schmoker don't have a clear view of the daily practices of teaching and learning in their schools Schmoker suggests that we need to get beyond this buffer to confront the truth about what is happening in classrooms and to allow teachers to learn from each other and to be supervised properly He outlines a plan that focuses on the importance of consistent curriculum authentic literacy education and professional learning communities for teachers What will students get out of this new approach Learning for life Schmoker argues passionately that students become learners for life when they have more opportunities to engage in strategic reading writing with explicit guidance and argument and discussion Through strong teamwork true leadership and authentic learning schools and their students can reach new heights Results Now is a
