

WHERE DOES MY FOOD GO AFTER I EAT IT?

Hello, apple!
You look yummy...
let's go!

On a journey through
my digestive system...

my **salivary glands**
make saliva, which
has enzymes that
start to chemically
break down the food

my **teeth** and
jaw chew the food
into small pieces

my **liver**
makes bile, which
helps neutralise
stomach acid and
digest some vitamins

bile is stored in
my **gall bladder**
until it's needed

in my **duodenum**,
bile and enzymes
from my pancreas
continue to break
down the food

my **colon**
absorbs water
and electrolytes

See you later,
stuff my body
doesn't want!

my **tongue**
mixes saliva
with the food

muscle contractions
push the food down
my **oesophagus**

my **stomach**
churns the food,
mixes it with strong
acid, and turns it
into a goopy soup

my **pancreas**
makes enzymes
that break down
the food

muscle contractions
push the food through
my **small intestine**,
which digests and
absorbs the nutrients
from the food

my **rectum** passes
the leftover waste out
into the toilet
