Food David Kilcast, 2004-04-14 Texture is one of the most important attributes used by consumers to assess food quality. With its distinguished editor and international team of contributors, this authoritative book summarises the wealth of recent research on what influences texture in solid foods and how it can be controlled to maximise product quality. The first part of the book reviews research on understanding how consumers experience texture when they eat and how they perceive and describe key textural qualities such as crispness. Part two considers the instrumental techniques used for analysing texture. It includes chapters on force deformation and sound input techniques, near infrared spectroscopy, NIR, nuclear magnetic resonance, NMR, and magnetic resonance imaging, MRI. The final part examines how the texture of particular foods may be better understood and improved. A number of chapters review ways of controlling the texture of fruits and vegetables, including the role of plant structure and compounds, the handling of raw materials, and technologies such as freezing and vacuum infusion. A final group of chapters discuss the texture of cereal foods, including bread, rice, pasta, and fried food. *Texture in food*, Volume 2: Solid foods, is a standard reference for the food industry. It is accompanied by a companion volume on the texture of semi-solid foods. Reviews developments in measuring the texture of solid foods. Examines the influences on texture and ways of maintaining textural properties. Written by an expert team of authors. [Fluoropolymer Applications in the Chemical Processing Industries](#) Sina Ebnesajjad, Pradip R. Khaladkar, 2004-12-02 This is a self-contained collection of data and information on applications of fluoropolymers, components for corrosion control in chemical processing industries. Due to their superior properties, fluoropolymers have been rapidly replacing metal alloys for preserving the purity of processing streams in the chemical processing, plastics, food, pharmaceutical, semiconductor, and pulp and paper industries.

Polyolefin Compounds and Materials Mariam Al-Ali AlMa'adeed, Igor Krupa, 2015-12-23 This book describes industrial applications of polyolefins from the researchers' perspective. Polyolefins constitute today arguably the most important class of polymers and polymeric materials for widespread industrial applications. This book summarizes the present state of the art. Starting from fundamental aspects such as the polymerization techniques to synthesize polyolefins, the book introduces the topic. Basic knowledge about polyolefin composites and blends is explained before applications. Aspects in different industry sectors are discussed. The spectrum comprises a wide range of applications and industry sectors such as the packaging and food industry, the textile industry, automotive, and buildings, and even biomedical applications. Topics which are addressed in the various chapters comprise synthesis and processing of the materials, their classification, mechanical, physical, and technical requirements and properties, their characterization, and many more. In the end of the book, even the disposal, degradation, and recycling of polyolefins are addressed, and light is shed on their commercial significance and economic value. In this way, the book follows the entire lifetime of polyolefin compounds and materials, from their synthesis and processing over applications to the recycling and reuse of disposed or degraded polyolefin substrates. **Fluoroelastomers Handbook** Jiri George Drobny, 2016-04-27 *Fluoroelastomers Handbook: The Definitive User's Guide*, Second Edition, is a comprehensive

reference on fluoroelastomer chemistry processing technology and applications It is a must have reference for materials scientists and engineers in the automotive aerospace chemical chemical process and power generation industries Covering both physical and mechanical properties of fluoroelastomers it is useful in addressing daily challenges in the use of these materials as well as the challenges posed in long term research and development programs Since the publication of the previous edition in 2005 many new findings and developments in chemistry technology and applications of fluoroelastomers have taken place This is the only book with updated information on the manufacturing process cross linking chemistry and the formulation of compounds as well as mixing processing and curing methods A fully revised chapter is included on applications and examples of fluoroelastomer compounds Safety hygiene and disposal standards and guidelines have been updated and a new chapter has been added to discuss new developments and current trends helping engineers and materials scientists stay ahead of the curve Presents the only definitive reference work on fluoroelastomer chemistry processing technology and applications Helps engineers and materials scientists with the day to day challenges of using fluoroelastomers as well as long term research and development programs Includes fully updated chapters on the chemistry manufacture and processing of fluoroelastomers as well as information on properties applications disposal and safety issues

Fluorinated Coatings and Finishes Handbook Laurence W. McKeen, 2015-10-11 Fluorinated Coatings and Finishes Handbook The Definitive User's Guide Second Edition addresses important frequently posed questions by end user design engineers coaters and coatings suppliers on fluorinated coatings and finishes thus enabling them to achieve superior product qualities and shorter product and process development times The book provides broad coverage of these fluorinated polymer coatings including the best known PTFE polytetrafluoroethylene first trademarked as Teflon and ePTFE GoreTex Their inherent qualities of low surface tension non stick low friction high melting point and chemical inertness make fluoropolymer coatings widely desirable across thousands of industrial and consumer applications but these properties also make it difficult to convert fluoropolymers to coatings that have sufficient adhesion to the substrate to be protected In this book readers learn how fluoropolymer coatings are used and made about their pigments and fillers binders dispersion processes additives and solvents The book includes substrate preparation coating properties baking and curing processes performance tests applications and health and safety Provides a practical handbook that covers the theory and practice of fluorinated coatings including the structure and properties of binders and how to get a non stick coating to stick to the substrate Covers liquid and powder fluorocoatings their applications methods curing and baking processes and their commercial end uses Presents detailed discussions of testing methods related to fluorocoatings common coating defects how they form how to eliminate them and the health and safety aspects of using and applying fluorocoatings Includes substrate preparation coating properties baking and curing processes performance tests applications and health and safety **Handbook of Hygiene Control in the Food Industry** John Holah, H.L.M.
