**Vocational & Technical Schools - East** Peterson's,2009-12-10 More than 2 200 vocational schools east of the Mississippi River Cover **Go Green Get Lean** Kate Geagan,2009-03-17 Over the past 20 years America has been steadily marching toward a diet that is more drenched in fossil fuel than any key nutrient Experts estimate that it now takes roughly 7 to 10 calories of fossil fuel energy to bring one calorie of food energy to the American plate Not only have our eating habits turned us into an increasingly overweight society but the alarming truth is that our food choices are having as much of an impact on the planet as the cars we drive Go Green Get Lean is the perfect eating plan for our time Revealing easy to follow steps anyone can take to eat for a healthy body and planet and drop up to 9 pounds in the first 2 weeks Kate Geagan helps readers see the questionable value of convenience foods and explains why going green doesn't require a drastic vegan overhaul Because there are many nutritional benefits to be drawn from some non plant based food choices she points readers to the best selections including occasional splurges they can enjoy in good conscience In learning to make truly LEAN choices Kate offers the following straightforward formula Before eating food ask yourself Local or global What was the Energy used to bring it to my plate Include processing packaging transportation and temperature of food Animal or plant Plant foods are greener Is this Necessary Is this food critical to my health and weight goals This trailblazing work the first to offer a specific weight loss plan along with the promise of a lowered carbon footprint makes it possible for readers to help the environment and their waistlines at the same time **Total Garbage** Edward Humes,2025-02-04 An investigative narrative that dives into the waste embedded in our daily lives and shows how individuals and communities are making a real difference for health prosperity quality of life and the fight against climate change by a Pulitzer Prize winning journalist What happens to our trash Why are our oceans filling with plastic Do we really waste 40 percent of our food 65 percent of our energy Waste is truly our biggest problem and solving our inherent trashiness can fix our economy our energy costs our

traffic jams and help slow climate change all while making us healthier happier and more prosperous This story driven and in depth exploration of the pervasive yet hard to see wastefulness that permeates our daily lives illuminates the ways in which we ve been duped into accepting absolutely insane levels of waste as normal Total Garbage also tells the story of individuals and communities who are finding the way back from waste and showing us that our choices truly matter and make a difference Our big environmental challenges climate energy plastic pollution deforestation toxic emissions are often framed as problems too big for any one person to solve Too big even for hope But when viewed as symptoms of a single greater problem the epic levels of trash and waste we produce daily the way forward is clear Waste is the one problem individuals can positively impact and not just on the planet but also on our wallets our health and national and energy security The challenge is seeing our epic wastefulness clearly Total Garbage will shine a light on the absurdity of the systems that all of us use daily and take for granted and it will help both individuals and communities make meaningful changes toward better lives and a cleaner greener world

Unquenchable Robert Jerome Glennon,2010-04-19 In the middle of the Mojave Desert Las Vegas casinos use billions of gallons of water for fountains pirate lagoons wave machines and indoor canals Meanwhile the town of Orme Tennessee must truck in water from Alabama because it has literally run out Robert Glennon captures the irony and tragedy of America s water crisis in a book that is both frightening and wickedly comical From manufactured snow for tourists in Atlanta to trillions of gallons of water flushed down

the toilet each year Unquenchable reveals the heady extravagances and everyday inefficiencies that are sucking the nation dry The looming catastrophe remains hidden as government diverts supplies from one area to another to keep water flowing from the tap But sooner rather than later the shell game has to end And when it does shortages will threaten not only the environment but every aspect of American life we face shuttered power plants and jobless workers decimated fisheries and contaminated drinking water We can't engineer our way out of the problem either with traditional fixes or zany schemes to tow icebergs from Alaska In fact new demands for water particularly the enormous supply needed for ethanol and energy production will only worsen the crisis America must make hard choices and Glennon's answers are fittingly provocative He proposes market based solutions that value water as both a commodity and a fundamental human right One truth runs throughout Unquenchable only when we recognize water's worth will we begin to conserve it
