This volume is the first to give an account of speech act pragmatics and im politeness in film conversation and in dubbing translation with a focus on requests The scope of the book is twofold on the one hand it describes the pragmatic features of requests in English and Italian film dialogue while on the other it reveals patterns and trends concerning their translation into dubbed Italian The first part of the volume appeals to scholars in cross cultural pragmatics and film conversation Differences and similarities in requestive behaviour are investigated in a comparative perspective between the two film languages while the pragmatic features typifying requests in film speech are analysed against features typifying requests in spontaneous conversation The second section of the book will appeal to translation scholars since it provides an insight into how the pragmatics and the im politeness of requests travel across languages in the translation process thus contributing to the largely under researched relationship between pragmatics and translation studies      **Fraseología, Diatopía y**

**Traducción / Phraseology, Diatopic Variation and Translation** Pedro Mogorrón Huerta, Antonio

Albaladejo-Martínez, 2018-11-15 In all languages humans frequently use linguistic combinations called phraseological units PUs in communicative acts These PUs are characterized by their institutionalized fixation and in many cases by their opacity Traditionally the work on phraseology has placed the emphasis on the total fixing of components and structures of verbal expressions Variation in PUs is currently an uncontested fact and has been extensively studied and analyzed In addition in the case of languages like Spanish English French spoken in many countries new creations or diatopic variants arise While these diatopic expressions have been collected or analyzed in their territory of influence no comprehensive collection showing all the expressions and contrastive analysis to observe the similarities and differences between these diatopic creations with all their idiosyncratic and cultural references have been made so far The content of this volume deals with numerous linguistic lexicographic and translational problems in the context of language variation in general as well as specifically related to diatopic variation The aim is to make progress in these challenging and highly interesting areas which still pose many comprehension and translation problems      **The Laughing Cure** Brian King, 2016-05-03
