DO-IT-YOURSELF INSTRUCTION BOOKLET

Horn loaded along-the-wall enclosure perfectly complements the famous Aristocrat

Designed for 12-inch or 15-inch coaxial speakers, or separate 2-way and 3-way systems . . . without need for modification

One full octave of added bass guaranteed over any commercially available bass reflex enclosure

Lowest price of any manufactured three-way system enclosure

Principle of Operation — Recognizing that the quality of a music reproducing system is proportionate to its size, Electro-Voice engineers have, through unique design, hidden the bulk of the acoustic system. The very walls of the room have been employed as an extension of this compact and beautiful enclosure. The result is a performance so striking that the first note heralds a vibrant new experience.

Correct propagation of the first three octaves, or those frequencies included between 16 and 128 cycles per second, requires that the cone of the low-frequency driver be loaded with an air column of great dimensions. For instance, the smooth reproduction of a 30-cycle tone requires that the cross-sectional area at the mouth of this column be a quarter of its wave length or 28 square feet. At 30 cycles this dimension is 78 square feet. It is quite apparent that a horn this size would never fit in a living room.

Electro-Voice's folded horn principle is our engineers' answer to the problem. It employs the walls of the room as an extension of the horn throat, and effectively extends the bass range by concealing an exponential horn in a cabinet of reasonable dimensions. The size of the horn, and therefore the lower limit of the reproductive range, is as great as the size of the room.

Through these means the MARQUIS delivers program material of remarkably wide range, virtually peak-free and fully powered. The MARQUIS generates treble and bass tones at full efficiency with purity never attained before in the living room.
