A First Lab in Circuits and Electronics Yannis P. Tsividis, 2018-03-07 Written by an award winning educator and researcher the sixteen experiments in this book have been extensively class tested and fine tuned This lab manual like no other provides an exciting active exploration of concepts and measurements and encourages students to tinker experiment and become creative on their own This benefits their further study and subsequent professional work The manual includes self contained background for all electronics experiments so that the lab can be run concurrently with any circuits or electronics course at any level It uses circuits in real applications which students can relate to in order to motivate them and convince them that what they learn is for real As a result the material is not only made interesting but helps motivate further study in circuits electronics communications and semiconductor devices

EXTENSIVE INSTRUCTOR RESOURCES Putting the Lab Together is an extensive resource for instructors who are considering starting a lab based on this book Includes an overview of a typical lab station suggestions for choosing measurement equipment equipment list with relevant information and detailed information on parts required This resource is openly available Instructor's Manual includes hints for choosing lab TAs hints on how to run the lab experiments guidelines for shortening or combining experiments answers to experiment questions and suggestions for projects and exams This manual is available to instructors who adopt the book
