**Small Unmanned Fixed-wing Aircraft Design** Andrew J. Keane,András Sóbester,James P. Scanlan,2017-12-04 Small Unmanned Fixed wing Aircraft Design is the essential guide to designing building and testing fixed wing UAVs or drones It deals with aircraft from two to 150 kg in weight and is based on the first hand experiences of the world renowned UAV team at the UK s University of Southampton The book covers both the practical aspects of designing manufacturing and flight testing and outlines and the essential calculations needed to underpin successful designs It describes the entire process of UAV design from requirements definition to configuration layout and sizing through preliminary design and analysis using simple panel codes and spreadsheets to full CFD and FEA models and on to detailed design with parametric CAD tools Its focus is on modest cost approaches that draw heavily on the latest digital design and manufacturing methods including a strong emphasis on utilizing off the shelf components low cost analysis automated geometry modelling and 3D printing It deliberately avoids a deep theoretical coverage of aerodynamics or structural mechanics rather it provides a design team with sufficient insights and guidance to get the essentials undertaken more pragmatically The book contains many all colour illustrations of the dozens of aircraft built by the authors and their students over the last ten years giving much detailed information on what works best It is predominantly aimed at under graduate and MSc level student design and build projects but will be of interest to anyone engaged in the practical problems of getting quite complex unmanned aircraft flying It should also appeal to the more sophisticated aero modeller and those engaged on research based around fixed wing UAVs
