Barrows, 2000-12-28 Revised and updated containing over 5 000 entries with over 1 100 more entries than in the previous edition Animal Behavior Desk Reference Second Edition A Dictionary of Behavior Ecology and Evolution provides definitions for terms in animal behavior biogeography evolution ecology genetics psychology statistics systematics and other **The Electric Meme** Robert Aunger, 2013-07-30 From biology to culture to the new new economy the buzzword on everyone's lips is meme How do animals learn things How does human culture evolve How does viral marketing work The answer to these disparate questions and even to what is the nature of thought itself is simply the meme For decades researchers have been convinced that memes were The Next Big Thing for the understanding of society and ourselves But no one has so far been able to define what they are Until now Here for the first time Robert Aunger outlines what a meme physically is how memes originated how they developed and how they have made our brains into their survival systems They are thoughts They are parasites They are in control A meme is a distinct pattern of electrical charges in a node in our brains that reproduces a thousand times faster than a bacterium Memes have found ways to leap from one brain to another A number of them are being replicated in your brain as you read this paragraph In 1976 the biologist Richard Dawkins suggested that all animals including humans are puppets and that genes hold the strings That is we are robots serving as life support for the genes that control us And all they want to do is replicate themselves But then we do lots of things that don't seem to help genes replicate We decide not to have children we waste our time doing dangerous things like mountain climbing or boring things like reading or stupid things like

smoking that don't seem to help genes get copied into the next generation. We do all sorts of cultural things for reasons that don't seem to have anything to do with genes. Fashions in sports, books, clothes, ideas, politics, lifestyles come and go and give our lives meaning, so how can we be gene robots? Dawkins recognized that something else was going on. We communicate with one another and we get ideas and these ideas seem to have a life of their own. Maybe there was something called memes that were like thought genes. Maybe our bodies were gene robots and our minds were meme robots. That would mean that what we think is not the result of our own creativity but rather the result of the evolutionary flow of memes as they wash through us. What is the biological reality of an idea with a life of its own? What is a thought gene? It's a meme. And no one before Robert Aunger has established what it physically must be. This elegant paradigm shifting analysis identifies how memes replicate in our brains, how they evolved, and how they use artifacts like books and photographs and advertisements to get from one brain to another. Destined to inflame arguments about free will, open doors to new ways of sharing our thoughts and provide a revolutionary explanation of consciousness. The Electric Meme will change the way each of us thinks about our minds, our cultures, and our daily choices.

Catalogue ... Brown, Frank R., Firm, Booksellers, **Critical Memetic Literacies in English Education** Leah Panther, Darren Crovitz, 2023-12-01. This edited collection introduces English and literacy educators to the theoretical research based and practical dimensions of using digital memetic texts in the classroom. Digital memetic texts come with new affordances, particularly as avenues for student creativity, voice, and advocacy. But these texts can also be put to manipulative, propagandistic, and nefarious purposes, posing critical challenges to an informed democratic citizenry. Grounded in multimodality and critical literacy, this book investigates the fascinating digital dimension of texts, audiences, and meaning, and considers how English educators might take up these conversations in practical ways with students. With authentic examples from teachers and students, this volume provides a road map to researchers and educators both preservice and in service interested in critical and productive uses of these modern phenomena.

"The" Athenaeum, 1833 **Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c**, 1831

The Role of Behavior in Evolution Henry C. Plotkin, 1988. These six original essays focus on a potentially important aspect of evolutionary biology: the possible causal role of phenotypic behavior in evolution. Balancing theory with actual or potential empiricism, they provide the first full examination of this topic. Plotkin's opening chapter outlines the conceptual minefields that the contributors attempt to negotiate. What is an adequate theory of evolution? What is behavior, and is it possible to maintain a distinction between behavior and other attributes of the phenotype? Is all or only a special subset of behavior both a cause and a consequence of evolution? And what do the theoretical issues mean in empirical terms? He concludes that any attempt to understand the causal role of behavior in evolution requires a more complicated theoretical structure than that of orthodox neo-Darwinism: a conceptualization of behavior as a distinctive set of phenotypic attributes and the accumulation of more data. David L. Hull, Northwestern University, provides an alternative account of the evolutionary

process by developing a hierarchy of replicators interactors lineages to replace the traditional one of genes organisms species Robert N Brandon Duke University also posits hierarchy as an appropriate architecture for the theoretical complexity needed to support an examination of the role of behavior in evolution F J Odling Smee Brunei University outlines a theoretical structure to encompass the behavior of phenotypes concentrating on the unrestricted definition of behavior everything that an animal does The remaining chapters are as much concerned with evidence as with theory Plotkin concentrates on a restricted definition of behavior behavior that is a product of choosing intelligence reviewing our empirical knowledge of how learning might influence evolution R I M Dunbar University College London uses empirical studies of vertebrate social behavior to deal with the question of how the social systems especially of primates might have a causal role in species evolution A Bradford Book *The History of Rome ...
