Hydrographic Manual Melvin J. Umbach, 1980 **Engineering Field Manual**, 1984 **Recording, Documentation and Information Management for the Conservation of Heritage Places** Robin Letellier, Rand Eppich, 2015-12-22 This two volume guide provides a comprehensive overview of the fundamental principles and guidelines for documenting cultural heritage places. It seeks to aid heritage managers and decision makers in understanding their roles and responsibilities in this essential activity. Volume 1 Guiding Principles explains why heritage managers must make sure that heritage information is fully integrated into all research, investigation and conservation activities. Through the discussion of basic principles, benefits and new approaches, it assists those in charge of preserving immovable cultural heritage by bringing current heritage information practices to a new level. By recording, we create a reference for evaluating change and add to the understanding of a site. By documenting, we guarantee that information is systematically collected and preserved for future use. By managing the information, we make it available and provide a basis for sharing our knowledge and understanding. Volume 2 presents illustrated examples from around the world. Good documentation of a site allows for better understanding of the site's value. Recognizing value and significance is often the first step toward a site's eventual conservation. The information obtained through the documentation process allows conservation professionals to record current conditions, consider appropriate conservation options, plan interventions, apply treatments, and finally measure the results of their efforts. Documentation can be a tool in resolving a conservation issue. This volume presents several illustration examples from around the world in various stages of conservation.
