

# **AGRICULTURE GRADE 10 NOTES**

## **Livestock Production Selection and Breeding**

### **Introduction**

- The breeding of animals is under human control, and the breeders decide which individuals shall produce the next generation.
- The breeder makes a choice.
- The breeding of animals is based upon the fact that certain qualities are genetic; hence valuable qualities are passed on from parents to off-springs.
- The qualities can be maintained or improved in the next generation.

### **The performance of an animal is influenced by two major factors;**

- Genetic potential
- The environment, which includes:
  - Feeding,
  - Health,
  - Care
  - The ecological conditions.
- The genetic potential of an animal is inherited from its parents.
- In selection and breeding animals with superior characteristics are selected and allowed to mate.
- In the process they transmit the superior characteristics to their offspring.
- When this is done over a long period of time, it results in livestock improvement.

### **Reproduction and Reproductive Systems**

- Reproduction is the process by which off-springs are produced.
- All farm animals multiply by means of sexual reproduction.
- It begins with fertilization which is the fusion of male and female gametes to form a zygote.
- Fertilization takes place internally in the body of the female.
- The embryo(zygote) formed develops inside body of mother, fed and protected until end of gestation period.
- In poultry, the process is different in that eggs are fertilized internally but laid and development of the chick takes place outside during incubation.
- In both male and female, certain organs are specialized for the process of reproduction.
- Some of these organs secrete fluids which are necessary for the movement and survival of the gametes (reproductive cells.)

Nijs, 2014-06-23 This book is a one stop reference for practitioners and academics in finance business and economics providing a holistic reference to the international agriculture business It takes a multidisciplinary approach looking at the issues opportunities and investable themes in the global agricultural space combining research and practical tools **GMO Food** David E. Newton, 2014-10-07 Providing an exhaustive background on the history of genetically modified organism GMO crops and foods as well as the controversies surrounding these products this book allows readers to develop their own particular viewpoint on the production and use of GMO substances Genetic engineering has long been used to impart desirable characteristics to food plants in order to improve crop yield pest resistance and herbicide tolerance Genetic modification of foods however has created a storm of controversy everywhere in the world including the United States What are the benefits of and risks involved with genetically modified organisms GMO and crops What powerful industry pressures have extended the sale and use of GMO foods and crops globally And how should consumer food products that involve GM ingredients be labeled GMO Food A Reference Handbook addresses these questions and the complex issues involved allowing readers to fully understand why genetically modified organisms represent one of the most important issues in the 21st century The book provides clear factual information and background on the history of genetically modified crops and foods covering topics such as the historic methods of plant and animal modification such as cross breeding and important discoveries in genetics biochemistry molecular biology genetic engineering and related fields the social political philosophical and economic issues that have arisen with these scientific advances and the laws and regulations that have resulted from the range of attitudes about GMO foods The book also supplies additional resources for readers performing extensive research in an annotated bibliography of books articles reports and web pages *Greening the Common Agricultural Policy* Great Britain. Parliament. House of Commons. Environment, Food and Rural Affairs Committee, 2012 The European Commission proposes that 30% of direct payments made to farmers under the Common

Agricultural Policy CAP would be conditional on compliance with three new greening measures While supporting the Commission's desire to improve the environment the EFRA Committee rejects the approach proposed Instead it calls for the EU to set high level objectives for the CAP that provide for flexibility to apply the right measures for local conditions through decentralising environmental protection under the CAP to Member States This report highlights the huge benefit that UK agri environment schemes have brought to biodiversity food production and the countryside The Committee also urged Defra to ensure that the UK's tenant farmers should not be excluded from these schemes The Committee concludes that Defra must ensure the balance of funding between mandatory and voluntary aspects of the CAP should not leave UK farmers at a competitive disadvantage relative to their counterparts in the rest of Europe MPs also warn that measures proposed by the Commission would be even more complex than the current system adding costly bureaucracy and generating more errors in the system Likewise the committee concludes that the Commission's crop diversification measure would in the UK have perverse consequences that are far less environmentally beneficial than crop rotation Of the three greening measures offered the Commission's proposal for Ecological Focus Areas EFA has the potential to deliver the greatest environmental benefit However the lack of definitions within the proposals make it difficult to assess what if any such benefits would actually be delivered

**International Trade and Food Security** Floor Brouwer, P K Joshi, 2016-07-08 This book explores structural changes in India's agrifood systems during the next ten to twenty years The dynamics in the agrifood sector is explored in the context of the overall economy taking into account agricultural and trade policies and their impacts on national and global markets The contributors draw on qualitative and quantitative approaches using both a national model to focus on urban rural relations and income distribution and an international model to focus on patterns of economic growth and international trade

Regional Overview of Food Security and Nutrition in Europe and Central Asia 2018 Food and Agriculture Organization of the United Nations, 2019-04-02 The Regional Overview of Food Security and Nutrition in Europe and Central Asia 2018 provides new evidence for monitoring trends in food security and nutrition within the framework of the 2030 Sustainable Development Agenda The in depth analysis of progress made against Sustainable Development Goal 2 Target 2.1 to end hunger and ensure access to food by all and Target 2.2 to end all forms of malnutrition as well as the state of micronutrient deficiencies is complemented by a review of recent policy measures taken to address food security and nutrition in all its dimensions The Europe and Central Asia ECA region encompasses great economic social and environmental diversity and its countries are facing various food security and nutrition challenges While they have made significant progress in reducing the prevalence of undernourishment over the past two decades new evidence shows a stagnation of this trend particularly in Central Asia Malnutrition in one or more of its three main forms undernutrition micronutrient deficiencies and overweight and obesity is present to varying degrees in all countries of the region Often all three forms coexist creating what is called the triple burden of malnutrition Overweight among children and obesity among

adults continue to rise with now almost one fourth of the region's adults obese and constitute a significant concern for future health and well being and related costs While poverty levels in most ECA countries have been declining in recent years poverty coupled with inequality has led to increased vulnerability of disadvantaged groups and populations in rural and remote areas of low and lower middle income countries New analysis shows that adult women have a higher prevalence of severe food insecurity than men in some areas pointing to gender inequalities that are reflected in access to food Addressing gender and other inequalities is key to achieving the Sustainable Development Goals and heeding the call to leave no one behind The publication's focus this year is on migration gender and youth and the linkages with rural development and food security in Europe and Central Asia Migration is linked in multiple ways to gender youth and agricultural and rural development both as a driver and possible source of development opportunities with labour migration and remittances playing significant roles in the region Changing migration processes need to be fully understood to better address the challenges of migration and harness the potential benefits for sustainable development and revitalized rural areas Governments public and private institutions communities and other concerned parties must strengthen collaboration and scale up efforts towards achieving the goals of a thriving healthy and food secure region

**The Governance of Agriculture in Post-Brexit UK** Irene Antonopoulos, Matt Bell, Aleksandra Čavoški, Ludivine Petetin, 2022-02-27 This book provides a multidisciplinary analysis of the impact of Brexit on British agriculture and associated areas discussing the Common Agricultural Policy and the Agriculture Act 2020 The Brexit referendum provoked new debates and questions over the future of agriculture in Britain and the potential positive and negative impacts of Brexit on both farmers and consumers These debates as well as the ensuing proposals relevant to the Agriculture Act 2020 have exposed the multidimensional effects of Brexit when it comes to agriculture With a focus on profitability the rights of farmers environmental protection as well as animal welfare this book brings together an interdisciplinary analysis of the future of British agriculture in post Brexit Britain More specifically it addresses the criticisms over the Common Agriculture Policy presents an analysis of the Agriculture Act 2020 and considers suggestions for future developments Through this analysis the book suggests a way towards the future with a positive outlook towards a competitive and sustainable agriculture that will satisfy the needs of farmers and consumers while ensuring environmental protection animal welfare and rural development This book will be of great interest to students and scholars of food and agricultural policy and politics agroecology and rural development as well as policymakers involved in Britain's post Brexit environmental policy

**The Agrarian Seeds of Empire** Brad Bauerly, 2016-09-07 The Agrarian Seeds of Empire outlines the influence of agrarian movements on the process of US institutional capacity building between 1840 1980 Out of the mix of the developing new Nation and the expanding capitalist system emerged strong farmer's movements that produced state building processes central to American political development It will show how the forces of state building and social movements converged to produce agro industrialization

This agro industrial developmental project was instrumental in both the development of the industrial food system and US Empire as the institutional capacities were later used to impose the same project outside of the US These findings link together and augment existing approaches to capitalist development International Relations and theories of the state and the food system
