Seasteading Joe Quirk, 2017-03-21 In these thought provoking visions of the future The Wall Street Journal Joe Quirk and Patri Friedman of the Seasteading Institute explain how ocean cities can solve many of our environmental technological and civic problems and introduce the visionaries and pioneers who are now making seasteading a reality Our planet has been suffering from serious environmental problems and their social and political consequences But imagine a vast new source of sustainable and renewable energy that would also bring more equitable economies A previously untapped source of farming that could produce significant new sources of nutrition Future societies where people could choose the communities they want to live in free from the restrictions of conventional citizenship This extraordinary vision of our near future as imagined

in Seasteading attracted the powerful support of Silicon Valley's Peter Thiel and it may be drawing close to reality Facing growing environmental threats French Polynesia has already signed on to build some of the world's first seasteads Joe Quirk and Patri Friedman show us how cities built on floating platforms in the ocean will work and they profile some of the visionaries who are implementing basic concepts of seasteading today An entrepreneur's dream these floating cities will become laboratories for innovation and creativity Seasteading offers hope for a future when life on land has grown grim Kirkus Reviews proving the adage that yesterday's science fiction is tomorrow's science fact **Science** John Michels (Journalist),2011 **Do You Remember House?** Micah Salkind,2018-12-19 Today no matter where you are in the world you can turn on a radio and hear the echoes and influences of Chicago house music Do You Remember House tells a comprehensive story of the emergence and contemporary memorialization of house in Chicago tracing the development of Chicago house music culture from its beginnings in the late 70s to the present Based on expansive research in archives and his extensive conversations with the makers of house in Chicago's parks clubs museums and dance studios author Micah Salkind argues that the remediation and adaptation of house music by crossover communities in its first decade shaped the ways that Chicago producers DJs dancers and promoters today re remember and mobilize the genre as an archive of collectivity and congregation The book's engagement with musical kinesthetic and visual aspects of house music culture builds from a tradition of queer of color critique As such Do You Remember House considers house music's liberatory potential in terms of its genre defiant repertoire in motion Ultimately the book argues that even as house music culture has been appropriated and exploited the music's porosity and flexibility have allowed it to remain what pioneering Chicago DJ Craig Cannon calls a musical Stonewall for queers and people of color in the Windy City and around the world
