

Technical Research Paper for Improving Label Comprehension

INTRODUCTION

Product labelling is a cornerstone in the communication between a consumer health product marketer and the public. For this reason, Consumer Health Products Canada is continually seeking means to improve labelling. The ever increasing amounts of information required by Health Canada to be on labels has resulted in a challenge to marketers and a review of the information currently on labels has concluded that little information can be omitted.

The Technical Research Paper for Improving Label Comprehension can be used by marketers as labels are revised or new labels developed. This paper contains means by which to improve consumer health product labels that will lead to an overall increase in comprehension by the public.

It is recognized that regulatory requirements, accommodation of English and French languages on labels and various packaging constraints may restrict the utilization of some of the suggested tactical guidelines.

This paper is presented in two sections, *Understanding of Label Copy* and *Readability of Label Copy*.

UNDERSTANDING OF LABEL COPY

1. ORGANIZATION

Base the order and prominence of information on what is of most importance to the reader. Strive for consistency in the layout of this information.

- o Active ingredients
- o Uses or indications
- o Warnings
- o Directions
- o Other information
- o Non-medicinal ingredients (Note: In the interest of consumer needs, this information may be given greater prominence.)

Place English and French messages on separate panels, if space is available, to avoid confusing the reader.

Label format: organizing the information in a structured format with dividing lines to highlight the information.
