Exemplars of Assessment in Higher Education, Volume Two Jane Marie Souza, Tara A. Rose, 2023-11-09 In this second volume of the successful Exemplars of Assessment in Higher Education editors Souza and Rose share examples of assessment practice from over fifteen distinct and diverse Higher Education Institutions including international contributions Building upon the work of the first volume the case studies in this book reflect the changes in assessment and higher education in the post Covid education environment The institutions that appear in this book were chosen for having an effective assessment approach in one or more of the following areas career readiness distance education diversity equity and inclusion or general education Each part of the book discusses one of these four areas with chapters that feature real life examples from the educators who teach at the college or university Featuring a Foreword by AAC U President Lynn Pasquerella the work highlighted in this book is also aligned with AAC U s Valid Assessment of Learning in Undergraduate Education VALUE initiative to help educators make the best decisions about measuring student learning This book is ideal for university educators and assessment practitioners looking to diversify and enhance their assessment practices A Co Publication with AAC U

Exemplars of Curriculum Theory Arthur K. Ellis, 2014-01-09 This book crosses the divide between theoreticians and practitioners by demonstrating how curriculum theories and models are applied in classrooms today It ties together broad educational theories such as progressivism essentialism perennialism etc curriculum models characterized as learner centered society centered or knowledge centered and exemplars of curriculum theories and models such as Reggio Emilia Core Knowledge the International Baccalaureate etc

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading

researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills **Turning the Page on Complex Texts** Diane Lapp,Barbara Moss,2016-04-28 Ensure all learners become successful close readers In this powerful resource the authors examine what features make a text complex Learn how to select appropriate complex texts and design instruction to meet the needs of every student Explore grade specific classroom scenarios that illustrate how to scaffold lessons to foster close reading and deepen comprehension at all stages of K 12 education Benefits Gain practical teaching strategies for creating close reading lessons Consider grade level specific instructional scenarios that illustrate how to support students reading comprehension as they learn to read closely Learn how to evaluate a text s complexity and how to ask text dependent questions that can help students engage with a text Study evidence for why continuous close assessment of student performance is vital for making sure all students learn to closely read complex texts Discover potential contingency scaffolds for the classroom and how to use them to promote student success in closely reading a text Contents Introduction Part I Background and Planning Information 1 Understanding Close Reading 2 Identifying Text Complexity 3 Making Decisions That Support Close Reading Instruction 4 Assessing During Close Reading Part II Instructional Scenarios 5 Understanding What the Text Says Through Differentiated Scaffolds 6 Understanding How the Text Works Through Differentiated Scaffolds 7 Understanding What the Text Means Through Differentiated Scaffolds 8 Supporting Knowledge Demands with Differentiated Scaffolds Epilogue Appendix A References and Resources **Collecting for the Curriculum** Amy J. Catalano,2015-09-28 If you re a librarian charged with collecting curriculum materials and children s literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book

closes with a discussion of the future of curriculum materials
