Geospatial Analysis A Comprehensive Guide:

Geospatial Analysis Michael J. De Smith, Michael F. Goodchild, Paul Longley, 2018 In this Guide we address the full spectrum of spatial analysis and associated modeling techniques that are provided within currently available and widely used geographic information systems GIS and associated software Collectively such techniques and tools are often now described as geospatial analysis although we use the more common form spatial analysis in most of our discussions The interactive web version of this Guide may be accessed via the associated Internet site www.spatialanalysisonline.com The contents and sample sections of the PDF version may also be accessed from this site In both cases the information is regularly updated

Geospatial Analysis Dr Michael J de Smith, Professor Michael F Goodchild, Professor Paul A Longley, 2018 Geospatial Analysis A Comprehensive Guide to Principles Techniques and Software Tools originated as material to accompany the spatial analysis module of MSc programmes at University College London delivered by the principal author Dr Mike de Smith The project was discussed with Professors Longley and Goodchild They kindly agreed to contribute to the contents of the Guide itself As such this Guide may be seen as a companion to the pioneering book on Geographic Information Systems and Science now changed to Science and Systems by Longley Goodchild Maguire and Rhind particularly the chapters that deal with spatial analysis and modeling Their participation has also facilitated links with broader spatial literacy and spatial analysis programmes Notable amongst these are the GIS T Body of Knowledge materials provided by the Association of American Geographers together with the spatial educational programmes provided through UCL and UCSB The formats in which this Guide has been published have proved to be extremely popular encouraging us to seek to improve and extend the material and associated resources further Many academics and industry professionals have provided helpful comments on previous editions and universities in several parts of the world have now developed courses which make use of the Guide and the accompanying resources Workshops based on these materials have been run in Ireland the USA East Africa Italy and Japan and a Chinese version of the Guide 2nd ed has been published by the Publishing House of Electronics Industry Beijing PRC www.phei.com.cn in 2009 A Chinese version of this 6th edition is due to be published in 2021 by Science Press
