

# INTRODUCING the world's first sophisticated teaching robot...

## **HERO<sup>1</sup>** the most important microprocessor-controlled device since the introduction of the microcomputer.

Your new robot will move, see, hear, speak, and learn whatever you teach it.

HERO is a completely self-contained, electro-mechanical robot capable of interacting with its environment. Controlled by an onboard programmable computer, this mechanical device is designed to learn, hear, see, and communicate in its own way.

The remarkable HERO-1 robot is in production now ready for you. Buy preassembled or build it from a kit either way it is the only teaching robot in the world capable of demonstrating and performing every major function in robotics.

It's also remarkably inexpensive, with the complete kit available at \$1,500 and the assembled robot at \$1,300.

Capable of eleven axes of motion, the robot can be programmed to pick up small objects with its arm. It will also speak in complete sentences, using its voice synthesizer.

With its own on-board computer, HERO-1 can function free of any external control - floating over a pre-determined course and performing specific functions you have programmed.

Remarkable though the robot is, its companion **Robotics Education Course** is an even more significant "first". It provides a thorough understanding of robot technologies, including robotics programming.

Consisting of a 1,200-page text divided into eleven learning units, this course is the most complete introduction to robotics available today.

The robot brings the learning process to life with hands-on demonstration of the principles of vision from them. You quickly get a practical grasp of industrial electronics, mechanics, computer theory and programming as applied to robots by putting them into action.

Basically, HERO-1 is a computer on wheels. You teach it. It teaches you. HERO-1's own functions are visual integration and ingenuity in programming, as you challenge its capabilities.

Its onboard processor can take it through complex maneuvers. The programming provides a straightforward way with provision for step-by-step debugging, enhancement and other corrections.

HERO-1 senses include: sound detection (frequency range 200-5000 Hz), light detection, ultrasonic ranging (range resolution is inch to 8 feet), ultrasonic motion detection, speech synthesis, and real time, four year calendar clock.

A completely mobile platform, robot, HERO-1 motor supplies pan/tilt head rotation and arm rotation of 360° shoulder rotation of 180° arm extension of 8 inches wrist/plot of 180° and end rotation of 90°. Gripper will open to a maximum of 2 1/2 inches and rotate 90° of extreme extension. Payload capacity of arm is 8 lbs. of maximum extension and 16 lbs. at maximum.

HERO-1 uses a 64KB microprocessor that controls 10 functions and seven boards. Programmable through keypad, teaching pendant, or cassette interface.

The robot features multiple operating modes including program, manual, teach, manual and sleep.
