the flagship's alignment with Alpha9 while we match vectors. Let me know if you think the flagship's vector could be better. That extra task delayed Excalibur's alignment and therefore she became the last ship in the fleet to signal her readiness for the jump. Fleet Commander on Tac2 Commander said the com AI Dejanus switched channels to her Command Pod. Excalibur Actual speaking said Dejanus in the formal form of address that ship COs normally didn't bother with. What's taking your Astro so long to get aligned? Commander Rostov didn't bother to hide his annoyance. Just double-checking the overall jump trajectory. Admiral Dejanus thought she heard Rostov swear under his breath but it could have been her imagination. You tell your Astro that if Excalibur isn't aligned in the next two minutes, I'll order him replaced and transferred to a cargo hauler. FC out. The astro AI managed to get the ship aligned within the deadline to no one's surprise. With all ships in the fleet now aligned perfectly with the flagship and jump velocity attained, the order was given to enter hyperspace. It was 131.3 hours later when both Koenig and Dejanus were on the Bridge again watching the jump chronometer countdown to the second when the ship should drop back down into normal space. Koenig watched the countdown clock hit zero and then start counting up again. After ten more seconds Dejanus began shaking her head. She had a horrified expression on her face. We've missed. That bastard has killed us all.
