Human Geography Landscapes Of Human Activities 12 Edition:

Human Geography Daniel R. Montello, Judith Getis, Jerome D. Fellmann, Arthur Getis, Mark Bjelland, 2013-01-11 This twelfth edition of *Human Geography* retains the organization and structure of its earlier versions. Like them, it seeks to introduce its users to the scope and excitement of geography and its relevance to their daily lives and roles as informed citizens. We recognize that for any student, human geography may be their first or only work in geography and this their first or only textbook in the discipline. For these students, particularly, we seek to convey the richness and breadth of human geography and to give insight into the nature and intellectual challenges of the field of geography itself. Urban Geography in America, 1950-2000 Brian J. L. Berry, James Wheeler, 2014-05-01 *Urban Geography in America* offers a comprehensive historiography of this major field. Compiling the best essays from the flagship journal *Urban Geography*, it shows the evolution of the field from the 1950s to 2000 as it shifted from data-driven social science modeling in the 1960s to the more critical perspectives of the 1970s to postmodernism in the 1980s to feminism and globalization in the 1990s. It covers all the major trends and figures and features some of the most important names in the field. Ultimately, this will be a necessary reference for all scholars in the field and all graduate students taking introductory courses and preparing for their comprehensive exams.

Forces of Nature Barry A. Vann, 2012-03-20 As long as the human species has existed, men and women have had to contend with the unpredictable forces of nature. Geographer Barry A. Vann brings a unique perspective to this age-old struggle in this illuminating overview of human population shifts and their precarious relationship with climate change and geography. Vann takes us on a journey along the migration routes of the earliest modern humans and tells why our ancestors chose to settle down in places that can be best described as natural utopias. In the religiously oriented worldview of ancient peoples, such places took on a sacred aura of divine favor. Similarly, destructive events such as volcanic eruptions and earthquakes were interpreted as expressions of divine wrath. Vann shows how the ancient texts of the Bible and the Qur'an offer glimpses of past climates that were distinctly different from the climate of our time. He also discusses the rise of technology as a means of controlling the threatening features of the natural world. Though technology has enabled humanity to cope with hostile climates, it has also created a false sense of security. Vann notes that population clusters are increasing in dangerous areas and that no technology can protect vulnerable groups from major category hurricanes, tornadoes, or earthquakes. Finally, he considers our current anxieties regarding global warming, pointing out that this focus has obscured a good deal of historical and geological evidence for a return of another ice age. *The Forces of Nature* offers a challenging perspective on the precarious balance between fragile human communities and their often threatening environments.
