**Leadership** Dr Larry F Ross, Sr, Larry F. Ross Sr., 2012-07 Leadership plays a major role in everything that we do in life. Though effective leadership is a personal role that requires individual thinking and attainment, one must make sure that it is focused on the overall success of the organization. However, there are other roles that are directly tied up in what we call leadership, and some of the roles include self-leading, managing change, empowering people, leading by example, delegating authority, facilitating cooperation, and building and leading a team. Leadership is not just power, but for the most part, it is about relationships. Leadership is also about one's power to reward and punish in a nondiscriminatory manner. To have a certain style or persona that ensures people will support your implementation of goals for the success of the organization. However, at the end of the day, you will never get there without first leading oneself to do the right thing in all of your endeavors. One learns leadership by being a leader. This cannot happen unless you have the proper skills: visionary, trustworthy, inspirational, etc. because leaders must balance many roles to be successful. However, sometimes you need help to guide and remind you how to take a course of action. This book serves as a sounding board to help guide you with its recording of best practices. Climb the ladder of leadership: hired, trainee, mentor, team lead, supervisor, manager, and executive, and let people know that you can successfully lead with every step you take.
