The Invaders Pat Shipman, 2015-03-10 A Times Higher Education Book of the Week Approximately 200 000 years ago as modern humans began to radiate out from their evolutionary birthplace in Africa Neanderthals were already thriving in Europe descendants of a much earlier migration of the African genus Homo But when modern humans eventually made their way to Europe 45 000 years ago Neanderthals suddenly vanished Ever since the first Neanderthal bones were identified in 1856 scientists have been vexed by the question why did modern humans survive while their closest known relatives went extinct Shipman admits that scientists have yet to find genetic evidence that would prove her theory Time will tell if she is right For now read this book for an engagingly comprehensive overview of the rapidly evolving understanding of our own origins Toby Lester Wall Street Journal Are humans the ultimate invasive species So contends anthropologist Pat Shipman and Neanderthals she opines were among our first victims The relationship between Homo sapiens and Homo neanderthalensis is laid out cleanly along with genetic and other evidence Shipman posits provocatively that the deciding factor in the triumph of our ancestors was the domestication of wolves Daniel Cressey Nature [Wolves on the Hunt](#) L. David Mech, 2015-05-22 The interactions between apex predators and their prey are some of the most awesome and meaningful in nature displays of strength endurance and a deep coevolutionary history And there is perhaps no apex predator more impressive and important in its hunting or more infamous more misjudged than the wolf Because of wolves habitat speed and general success at evading humans researchers have faced great obstacles in studying their natural hunting behaviors The first book to focus explicitly on wolf hunting of wild prey Wolves on the Hunt seeks to fill these gaps in our knowledge and understanding Combining behavioral data thousands of hours of original field observations research in the literature a wealth of illustrations and in the e book edition and online video segments from cinematographer Robert K Landis the authors create a compelling and complex picture of these hunters The wolf is indeed an adept killer able to take down prey much larger than itself While adapted to hunt primarily hooved animals a wolf or especially a pack of wolves can kill individuals of just about any species But even as wolves help drive the underlying rhythms of the ecosystems they inhabit their evolutionary prowess comes at a cost wolves spend one third of their time hunting the most time consuming of all wolf activities and success at the hunt only comes through traveling long distances persisting in the face of regular failure detecting and taking advantage of deficiencies in the physical condition of individual prey and through ceaseless trial and error all while risking injury or death By describing and analyzing the behaviors wolves use to hunt and kill various wild prey including deer moose caribou elk Dall sheep mountain goats bison musk oxen arctic hares beavers and others Wolves on the Hunt provides a revelatory portrait of one of nature's greatest hunters **Enchanted Hunt** L.L.
