Automatic Transmissions - Manual Control Sequence Automatic Transmission and Transaxle Committee,2017 The
scope and purpose of this SAE Recommended Practice is to provide a standard pattern or sequence for the manual control of
automatic transmissions in passenger cars and light duty trucks This generally refers to left hand drive mechanical shift
applications This document is published as Stabilize The J915 content is not fully compliant with current industry
developments and as such may require a different standard The content within the J915 standard relies on Federal Motor
Vehicle Safety Standards FMVSS 102 and 114 Portions of the J915 standard that are unique may not represent current
common practices within the user community When this standard was initially published it reflected a common philosophy
towards automatic transmission manual controls sequence Since that time changing technologies like self driving cars
satellite controlled driven cars and electric cars may have led members of the user community to have potentially divergent
methods for manual controls sequences of automatic transmissions beyond the minimum requirements specified within the
applicable Federal Motor Vehicle Safety Standards As a result a different standard may be required **Manual**
