**Numerical Systems of Nigerian Languages** Ndimele, Ozo-mekuri, Chan, Eugene S.L., 2016-04-30 The papers in this collection present the numerical systems of more than twenty Nigerian languages. The papers mainly emanate from a workshop on the numerical systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt Nigeria. The workshop arose from awareness created by Dr Eugene S L Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages. The quantum of mathematical computations addition multiplication subtraction or a combination of two or all of these involved in the numerical systems of Nigerian languages is remarkable. The papers reveal that a variety of numerical systems do exist such as binary decimal incomplete decimal duodecimal quinary quaternary ternary mixed body part tally systems and much more. The book is a resource about how different languages manipulate their numerical systems.
