Numerical Mathematics and Advanced Applications Miloslav Feistauer, Vit Dolejší, Peter Knobloch, Karel Najzar, 2012-12-06 These proceedings collect the major part of the lectures given at ENU MATH2003 the European Conference on Numerical Mathematics and Advanced Applications held in Prague Czech Republic from 18 August to 22 August 2003 The importance of numerical and computational mathematics and sci entific computing is permanently growing There is an increasing number of different research areas where numerical simulation is necessary Let us men tion fluid dynamics continuum mechanics electromagnetism phase transi tion cosmology medicine economics finance etc The success of applications of numerical methods is conditioned by changing its basic instruments and looking for new appropriate techniques adapted to new problems as well as new computer architectures The ENUMATH conferences were established in order to provide a forum for discussion of current topics of numerical mathematics. They seek to convene leading experts and young scientists with special emphasis on con tributions from Europe Recent results and new trends are discussed in the analysis of numerical algorithms as well as in their applications to challenging scientific and industrial problems The first ENUMATH conference was organized in Paris in 1995 then the series continued by the conferences in Heidelberg 1997 Jyvaskyla 1999 and Ischia Porto 2001 It was a great pleasure and honour for the Czech numerical community that it was decided at Ischia Porto to organize the ENUMATH2003 in Prague It was the first time when this conference crossed the former Iron Courtain and was organized in a postsocialist country The Arnoldian .1981 Resources in Education .1999

Sex, Gender and Time in Fiction and Culture B. Davies, J. Funke, 2011-03-01 Investigating modern art literature theory and the law this book illustrates the different ways in which sex gender and time intersect. It demonstrates that time offers new critical perspectives on sex and gender and makes problematic reductive understandings of sexual identity as well as straight and queer time

Unthinking Epistemicide Lucas Van Milders,2024-11-05 How can the supremacy of the Western worldview be undone This book argues that the cause of social and political inequalities is above all the inequality of non Western worldviews when compared to that of the West Developing a critical theory and praxis for undoing epistemicide or in other words the murder of knowledge this book challenges the approach of the West and the rest Epistemicide refers specifically to the destruction of non Western forms of knowledge production that has facilitated the hegemony of Western centric epistemology or one that takes the West as a universalized perspective Rather than rehashing well known critiques of Western centrism this book develops the claim that alternative to the West vs Rest hierarchy worldviews are necessarily plural as each way of looking at

the world reflects a particular perspective on the world Bringing this plurality of perspectives into a dialogue that celebrates difference and equality this book presents both a theoretical understanding of the world as hosting multiple worldviews and a practical conception of these worldviews as always already enacted within the world Undoing the dominance of the Western centric worldview entails looking at the different ways of being in the world that exist today and that reflect the prospect of a world in which many worlds are possible
