Beef Cattle Production and Trade Lewis Kahn, David Cottle, 2014-04-15 Beef Cattle Production and Trade covers all aspects of the beef industry from paddock to plate. It is an international text with an emphasis on Australian beef production written by experts in the field. The book begins with an overview of the historical evolution of world beef consumption and introductory chapters on carcass and meat quality, market preparation and world beef production. North America, Brazil, China, South East Asia and Japan are discussed in separate chapters followed by Australian beef production including feedlotting and live export. The remaining chapters summarise R & D emphasising the Australian experience and look at different production systems and aspects of animal husbandry such as health, reproduction, grazing, feeding and finishing, genetics and breeding, production efficiency, environmental management and business management. The final chapter examines various case studies in northern and southern Australia covering feed demand and supply, supplements, pasture management, heifer and weaner management and management of internal and external parasites.
