Managerial Economics and Business Strategy Michael R. Baye, 2000 **The African Food Environments** Amos Laar, Kaleab Baye, Anna Lartey, Francis Zotor, Gershim Asiki, 2023-09-05

In many respects the continent of Africa is in transition. Prominent among them currently is the nutrition transition. One consequence of the nutrition transition is the increase in prevalence of nutrition related non communicable diseases (NCDs) such as obesity, type 2 diabetes, cardiovascular diseases, and certain cancers. Although NCDs are a global public health problem, the rate of increase in NCDs morbidity and mortality in some African countries is staggering. This surge has been linked to modifiable environmental factors, factors that facilitate the consumption of obesogenic energy dense nutrient poor foods rather than unrefined cereals, fruits, and vegetables. It has long been recognized that the physical and social environments in which people live, work, and eat are critical determinants of their health. More recently, there has been a greater focus on the food environment as a key determinant of health. Available evidence shows that unhealthy food environments drive unhealthy diets, and unhealthy diet is one of four main risk factors for NCDs.

Managerial Economics Thomas J. Webster, 2014-12-24

Each year thousands of businesses file for bankruptcy protection because managers fail to efficiently organize the company's operations, misread market trends, pay inadequate attention to product quality, or misinterpret the activities and intentions of rival companies. Perhaps they fail to formulate optimal advertising or financing strategies, procure raw materials and components at least cost, or provide adequate incentives to motivate workers to put forth their best efforts. Managerial economics is the application of economic principles to topics of concern to managers. This textbook develops a framework for predicting managerial responses to changes in the business environment. It combines the various business disciplines with quantitative methods to identify optimal solutions to more efficiently achieve a firm's organizational objectives. The topics

discussed in this textbook are readily accessible to students with a background in the principles of microeconomics and business mathematics The selection and organizations of topics makes the textbook appropriate for use in a wide range of curricula by students with different backgrounds **Managerial Economics** James R.
