Nicholas, Herman Steyn, 2008 Appropriate for classes on the management of service product and engineering projects this book encompasses the full range of project management from origins philosophy and methodology Technology Integration to Business John T. Yee, Seog-Chan Oh, 2012-08-31 Today s global business to actual applications environments drive companies to be more technology dependent and to remain competitive firms need to introduce or adopt a new technology to business In order to achieve a successful integration with maximum return on investment companies need a systematic approach that accommodates a comprehensive course of action of technology integration Technology Integration to Business Practical Methods and Case Studies suggests a business driven holistic approach of technology integration that consists of several steps First companies should examine the current state issues benefits and obstacles of technology integration in conjunction with their competitive business strategy and operational capability Second firms should investigate new emerging business technologies as to how those technologies can contribute to improve the business Third with the technology integration needs identified companies should complete preparatory tasks before actual implementation such as business process analysis technology assessment technology provider investigation business case development and cost benefit analysis Fourth because the nature of technology integration project involves many stakeholders in global locations firms should use effective project management knowledge from project initiation through planning execution control to close Students will learn real world technology integration processes in industry settings and become more prepared for industrial careers Practitioners will find thorough procedures and methods that are useful in practice to improve business performance Realistic examples for manufacturing logistics and supply chain management application domains give the reader practical implications for the methods presented Changing Gears J. Carlopio, 2003-02-20 Many change management programmes designed to implement new technology are unsuccessful The author draws upon a number

of perspectives in change management and organisational strategy to show that failure is often not to do with technical factors but because of resistance of the workforce He presents a new approach to implementing technology based upon the persuasion and commitment of the main stakeholders Carlopio argues that senior managers should take organisational sensitivities and characteristics into account and build a communication and training and development strategy that will support the implementation of change In this way members of an organisation will be encouraged to embrace the new technology and it will become a part of their corporate mindset Managing Projects for Success Albert Hamilton, 2001 The influences of modern technology and competitive environments have a direct impact on the outcomes of projects irrespective of project type This text is a response to the growing need for better management which many people find necessary when leading or working within teams or groups undertaking a project Increasingly people in a working environment are engaged in organised practices and utilising resources facing the challenge of having to meet or better predetermined cost budgets and strict timetables The fact that most work is organised into programs or singular projects means that people require increasing guidance in project management Forecasting and Management of Technology Alan L.
