Chapter 8 Numerical Calculus and Differential Equations

8-1

The area A under the curve of $f(x)$ from $x=a$ to $x=b$.
Figure 8.1-1

$$A = \int_a^b f(x) dx$$

Find the following
integral:

$$A = \int \sin(x^2) dx \quad \text{Fresnel's cosine integral}$$

8-2

Illustration of (a) Rectangular and (b) Trapezoidal numerical integration. Figure 8.2-1

8-3

Numerical integration functions. Table 8.2-1

Command	Description
<code>quad('fun',a,b,tol)</code>	Uses an adaptive Simpson's rule to compute the integral of the function "fun" with a as the lower integration limit and b as the upper limit. The parameter tol is optional. tol indicates the specified error tolerance.
<code>quadl('fun',a,b,tol)</code>	Uses Lobatto quadrature to compute the integral of the function "fun". The rest of the syntax is identical to quad.
<code>trapz(x,y)</code>	Uses trapezoidal integration to compute the integral of y with respect to x, where the array y contains the function values at the points contained in the array x.

8-4

MATLAB function **quad** implements an adaptive version of Simpson's rule, while the **quadl** function is based on an adaptive Lobatto integration algorithm. To compute the **sine** integral, type:

```
>> A = quad('sin',0,pi)
```

The answer given by MATLAB is 2, which is correct. We use **quadl** the same way; namely,

```
>> A = quadl('sin',0,pi).
```

Integration example: Create the function:

```
function c2 = cosxq(x)
```

```
% cosine x squared function Fresnel's int.
```

```
c2 = cos(x.^2);
```

Now that you **must** use array exponentiation (`.^`).

The **quad** function is called as follows:

```
>> quad('cosxq',0,sqrt(2*pi))
```

The result is 0.6119.

8-5

A potential problem with integration.

A function having a **singularity** at $x=1$. Figure 8.1-2

The plot of
 $y = 1/(x-1)$

$$\int \frac{1}{x-1} dx = \ln|x-1|$$

Some integrals
have **infinite**
values. These are
called **improper**
integrals.

First International Symposium on Urban Development: Koya as a Case Study F. M. Khoshnaw, 2013-12-16 This book contains papers presented at the International Symposium on Urban Development held in the Kurdistan region of Iraq organised by the Faculty of Engineering at Koya University. The Kurdistan region is rich in oil gas mineral resources and underground water. However until recently the political and security issues were such that the region was unable to take advantage of those resources. Nowadays Kurdistan is emerging as one of the fastest developing areas in the Middle East with its universities playing a major role in this process. The aim of the meeting was to focus the research carried out at academic and government institutions with the needs of Society. The International Symposium papers included in this volume cover a wide range of topics and are written by people with different specialisations and perspectives.

Ripples in Time, A.I. Godfather, Engineering Jesus Jeff Walter Haugen, 2018-11-29 From the age of seven to

about twelve I suffered from epileptic seizures I took medicine for years and years then one day I just noticed it had gone away seemingly on its own I highly doubt the medicine I was on had any effect upon my condition Upon reading through some passages I discovered around that age the brain naturally goes through a reorganization process in which it reinforces the parts we regularly use and removes the ones we don't to improve efficiency I have no idea what garbage they were feeding me but now in my later years I have learned that cannabis could have spared me from the needless suffering
