

2. SYSTEM OVERVIEW

2.1 SYSTEM DESCRIPTION

The SOCR System (Figure 1) contains electronics that control the continuous stimulation and sensing required to collect real-time intracardiac impedance and heart sounds signals. The impedance signals are collected from selected electrode vector configurations using the subject's implanted pacing leads/LV catheter and an investigational impedance pacing unit, the Model 19061 Acute Human Monitor (AHM) Module. A Model 2090 programmer with the SOCR Investigational Software along with a switch on the front panel of the AHM Module allow the user to select specific electrode vector configurations for current stimulation and voltage sense measurement. The heart sounds signals are collected from an investigational Model 19062 Heart Sound Sensor Device placed on the subject.

Real-time impedance and auxiliary signals from analog output terminals of the AHM Module, real-time heart sounds and EGM/marker signals from the two programmers through a 2090A/B Analog Output Module, and real-time LV pressure signals from the Millar PCU-2000 are transmitted to the applicable Biopac Data Acquisition System's analog input terminals. The Biopac Data Acquisition System transmits the acquired analog input signals to the computer's data acquisition software [AcqKnowledge[®]] which subsequently saves the data to the computer's hard disk and displays real time waveform data on the computer's display.

The AHM Module also contains circuitry for standard pacing interventions with the implanted right atrial (RA) lead, right ventricular (RV) pacing lead, and left ventricular (LV) pacing lead or catheter. The leads are connected to an investigational Model 15420 Patient Cable in order to interface with the AHM Module. The LV catheter is directly connected.

The Biopac MP150 Data Acquisition System also collects physiologic signals from standard EP laboratory equipment used for subject monitoring during device implant. These physiologic signals may include ECG, blood pressure, or other physiologic signals. Available physiologic signals can be recorded simultaneously with the above signals but are not required by Medtronic to obtain the study objectives.

The SOCR system is shown pictorially in Figure 1.

Developing a Framework for Supply Chain Planning in Construction Micael Thunberg, 2016-09-28 Supply chain management SCM has been stressed as a remedy to many of the underlying issues in the construction industry However the positive examples where SCM has been successfully utilised and diminished the lingering issues in construction is scarce The question is why Previous studies have stressed the importance of planning both the construction project as such but also the supply chain and the logistics As an important part of SCM supply chain planning SCP focuses on planning different aspects of the supply chain through involving different members of the supply chain in the planning process SCP in construction is scarce as the planning of the logistics in general Failing to plan the supply chain involving supply chain members in the planning and integrating the processes of planning the supply chains and the construction project can be one reason for the low numbers of successful SCM adoption in construction In improving the SCP in construction this thesis develops a SCP framework for construction that involves the main contractor subcontractors and suppliers The aim is to improve SCP collaboration and eliminate many of the common problems in construction through a SCM and SCP perspective The developed framework is based on an existing planning framework for sales and operations planning This framework is generic and synthesises planning in general It consists of identifying developing outcomes input organisation process key performance measurements and IT tools It is thus necessary to investigate what these aspects means in a construction context Four research objects will be fulfilled Objective 1 Identify common logistical problems and linkages between them Objective 2 Develop a SCP process Objective 3 Develop a SCP organisation Objective 4 Identify performance measurements

Graduate School Commencement University of Minnesota. Graduate School,2003 Statistics Using Technology, Second Edition Kathryn Kozak,2015-12-12 Statistics With Technology Second Edition is an introductory statistics textbook It uses the TI 83 84 calculator and R an open source statistical software for all calculations Other technology can also be used besides the TI 83 84 calculator and the software R but these are the ones that are presented in the text This book presents probability and statistics from a more conceptual approach and focuses less on computation Analysis and interpretation of data is more important than how to compute basic statistical values

Being as Communion William A. Dembski,2016-04-15 For a thing to be real it must be able to communicate with other things If this is so then the problem of being receives a straightforward resolution to be is to be in communion So the fundamental science indeed the science that needs to underwrite all other sciences is a theory of communication Within such a theory of communication the proper object of study becomes not isolated particles but the information that passes between entities In Being as Communion philosopher and mathematician William Dembski provides a non technical overview of his work on information Dembski attempts to make good on the promise of John Wheeler Paul Davies and others that information is poised to replace matter as the primary stuff of reality With profound implications for theology and metaphysics Being as Communion develops a relational ontology that is at once congenial to science and open to teleology in nature All those interested in the intersections of theology philosophy and science should read this book

Plato's Theory of Knowledge Plato,2013-02-22 Two masterpieces of Plato s later period The Theaetetus offers a systematic treatment of the question What is knowledge The Sophist follows Socrates cross examination of a self proclaimed true philosopher

Thinking, Believing, and the Realm of Appearances Lara Trivellizzi,2025-05-12 This book investigates Plato s later theory of knowledge with regard to perceptual cognition and its epistemological status It is argued that in Plato

s later dialogues the three main cognitive phenomena related to acquaintance with the realm of perceptibles sense perception appearance and belief undergo a process of reciprocal conceptual disentanglement As a result the notions of sense perception and belief get disambiguated and clearly separated from the notion of appearance In addition those notions are integrated into an innovative epistemological model whose accuracy and reliability is clearly superior to the model previously embraced in the early and middle dialogues In these dialogues indeed sense perception and belief were still conflated with each other and with the problematic sophistic notion of appearance

Kinship in Ancient Athens S. C. Humphreys, 2018-11-08 The concept of kinship is at the heart of understanding not only the structure and development of a society but also the day to day interactions of its citizens *Kinship in Ancient Athens* aims to illuminate both of these issues by providing a comprehensive account of the structures and perceptions of kinship in Athenian society covering the archaic and classical periods from Drakon and Solon up to Menander Drawing on decades of research into a wide range of epigraphic literary and archaeological sources and on S C Humphreys expertise in the intersections between ancient history and anthropology it not only puts a wealth of data at readers fingertips but subjects it to rigorous analysis By utilizing an anthropological approach to reconstruct patterns of behaviour it is able to offer us an ethnographic thick description of ancient Athenians interaction with their kin that offers insights into a range of social contexts from family life rituals and economic interactions to legal matters politics warfare and more The work is arranged into two volumes both utilizing the same anthropological approach to ancient sources Volume I explores interactions and conflicts shaped by legal and economic constraints adoption guardianship marriage inheritance property as well as more optional relationships in the field of ritual naming rites de passage funerals and commemoration dedications cultic associations and political relationships both formal Assembly Council and informal hetaireiai Among several important and novel topics discussed are the sociological analysis of names and nicknames the features of kin structure that advantaged or disadvantaged women in legal disputes and the economic relations of dependence and independence between fathers and sons Volume II deals with corporate groups recruited by patrification and explores the role of kinship in these subdivisions of the citizen body tribes and trittyes both pre Kleisthenic and Kleisthenic phratries gen and demes The section on the demes stresses variety rather than common features and provides comprehensive information on location and prosopography in a tribally organized catalogue

Plato's Theaetetus as a Second Apology Zina Giannopoulou, 2013-06-27 Zina Giannopoulou offers a new reading of *Theaetetus* Plato's most systematic examination of knowledge alongside *Apology* Socrates speech in defence of his philosophical practice and argues that the former text is a philosophical elaboration of the latter
