The Ministry of The Wise Olatundun Romoke Awopetu, 2025-01-10 Life is an adventure in which humankind explores its ministerial mission under natural instincts with a desire for outstanding accomplishments However human experiences from age to age incorporated with scientific discoveries are in consensus that life has more questions than answers it can provide Every stage of life has developmental difficulties confronting man woman boy or girl which the individual is expected to overcome Some graciously pass through with minimal challenges some narrowly escape to the next stage but with some carryover of troubles Some get stuck and become stagnant at a particular stage while others perish and cannot continue But the will of God for you and me is to enjoy an abundant life and prosper as our souls prosper This book exposes the secret of overcoming our life challenges with the strength of God through the power of our Lord Jesus Christ as against human strength and the knowledge of the world It projects the word wisdom as a universal tool or a single weapon for combating life challenges and winning the noble title of overcomer The book also emphasizes the need for believers to arise out of their spiritual slumber and awake into the righteousness of the Lord as the second coming of our Lord Jesus Christ draws nearer than ever You will also encounter some analysis of relevant biblical stories and a few life experiences of the authors as you read on 101

Relationships in the Organization of Knowledge A. Bean, R. Green, 2013-04-17 Relationships abound in the library and information science LIS world Those relationships may be social in nature as for instance when we deal with human relationships among library personnel or relationships i e public relations between an information center and its clientele The relationships may be educational as for example when we examine the relationship between the curriculum of an accredited school and the needs of the work force it is preparing students to join Or the relationships may be economic as when we investigate the relationship between the cost of journals and the frequency with which they are cited Many of the relationships of concern to us reflect phenomena entirely internal to the field the relationship between manuscript collections archives and special collections the relationship between end user search behavior and the effectiveness of searches the relationship between access to and use of information resources the relationship between recall and precision the relationship between various bibliometric laws etc The list of such relationships could go on and on The relationships addressed in this volume are restricted to those involved in the organization of recorded knowledge which tend to have a conceptual or semantic basis although statistical means are sometimes used in their discovery
