**Jammu & Kashmir** Bilal

Ahmad Khan,2022-03-25 The book presents a comprehensive treatment of unemployment and economic problems in Jammu Kashmir Kashmir being a conflict ridden zone has far less opportunities for employment than rest of the other states With an underdeveloped industrial sector and the inability of government to create enough jobs there seems to be no immediate solution Lack of avenues to engage the youth in meaningful ways result in making miscreants out of many of them Young populations across the world are generally seen as drivers of socio economic growth but in Kashmir the youth bulge is a problem Unemployed youths destabilize the economy by being used to create mayhem by the anti social elements in the region Underdevelopment and unemployment in Jammu Kashmir is the manifestation of a mismatch between physical and human resources This exists when a large segment of the working age population does not possess the appropriate skills and knowledge to be gainfully employed In addition lackadaisical and imprudent policies pursued by subsequent governments are the major challenge A radical shift in its policies especially in the education sector is an absolute prerequisite for the birth of a capable workforce The remedy lies in revamping the education sector by crafting appropriate policies for suitable skills in line with the socio economic requirements of the society The book argues the government must think about a long term plan for unemployed youth and devise a policy to channel the youth bulge constructively

K. Mishra,Sudhanshu Kumar Mishra,1994 The book shows that the instant need to feed the teeming millions propelled us to increase the use of chemical fertilizers and adopt better agricultural practices which have created multifaced problems in agriculture However these methods have been killing the natural fertilizing potential of soil The persistently growing use of external nutrients has enormously raised the cost of farming thus turning agriculture into an unremunerative occupation Excessive use of chemical fertilizers has also been causing long term hazards to soil fertility and intensifying the need of subsidy on domestic and imported fertilizers All these hinder sustainable growth of agriculture The study also shows that prices of inputs which farmers have been using have increased at a much faster rate than those of agriculture output causing impoverishment in real sense among them and making agriculture an occupation of last resort
