**Progress Toward Restoring the Everglades** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Water Science and Technology Board, Committee on Independent Scientific Review of Everglades Restoration Progress, 2017-05-07 The Everglades ecosystem is vast stretching more than 200 miles from Orlando to Florida Bay and Everglades National Park is but a part located at the southern end During the 19th and 20th centuries the historical Everglades has been reduced to half of its original size and what remains is not the pristine ecosystem many image it to be but one that has been highly engineered and otherwise heavily influenced and is intensely managed by humans Rather than slowly flowing southward in a broad river of grass water moves through a maze of canals levees pump stations and hydraulic control structures and a substantial fraction is diverted from the natural system to meet water supply and flood control needs The water that remains is polluted by phosphorus and other contaminants originating from agriculture and other human activities Many components of the natural system are highly degraded and continue to degrade Progress Toward Restoring the Everglades is the sixth biennial review of progress made in meeting the goals of the Comprehensive Everglades Restoration Plan CERP This complex multibillion dollar project to protect and restore the remaining Everglades has a 30 40 year timeline This report assesses progress made in the various separate project components and discusses specific scientific and engineering issues that may impact further progress According to Progress Toward Restoring the Everglades a dedicated source of funding could provide ongoing long term system wide monitoring and assessment that is critical to meeting restoration objectives This report examines the implications of knowledge gained and changes in widely accepted scientific understanding regarding pre drainage hydrology climate change and the feasibility of water storage since the CERP was developed **Federal Register** ,2012-11 **A Better Way to Build** Michael R. Adamson, 2013-01-15 While architects have been the subject of many scholarly studies we know very little about the companies that built the structures they designed This book is a study in business history as well as civil engineering and construction management It details the contributions that Charles J Pankow a 1947 graduate of Purdue University and his firm have made as builders of large often concrete commercial structures since the company s foundation in 1963 In particular it uses selected projects as case studies to analyze and explain how the company innovated at the project level The company has been recognized as a pioneer in design build a methodology that involves the construction company in the development of structures and substitutes negotiated contracts for the bidding of architects plans The Pankow companies also developed automated construction technologies that helped keep projects on time and within budget The book includes dozens of photographs of buildings under construction from the company s archive and other sources At the same time the author analyzes and evaluates the strategic decision making of the firm through 2004 the year in which the founder died While Charles Pankow figures prominently in the narrative the book also describes how others within the firm adapted the

business so that the company could survive a commercial market that changed significantly as a result of the recession of the 1990s Extending beyond the scope of most business biographies this book is a study in industry innovation and the power of corporate culture as well as the story of one particular company and the individuals who created it **Life Cycle**

**Assessment of Energy Systems** Nicholas Sakellariou, 2018-05-04 This groundbreaking work is the most in depth and state of the art study on the Life Cycle Assessment LCA of energy systems the only volume available on this critical subject Energy and sustainability are two of the most important and often most misunderstood subjects in our world today As these two subjects have grown in importance over the last few decades interest in the Life Cycle Assessment LCA model has grown as well as a potentially crucial tool in understanding and striving towards sustainability in energy systems Not just wind and solar systems but all energy systems need to be understood through this model Wind and solar power have the potential to decentralize the U S energy system by offering local communities electricity and economic support depending on the scale and design of projects Nevertheless every energy technology potentially faces environmental costs lay and expert opposition and risks to public health Engineers play a central role as designers builders and operators in energy systems As they extend their expertise into electrical mechanical and chemical fields from fossil fuel based systems to renewable energy systems sustainability is steadily becoming one of the key criteria engineers apply in their work This groundbreaking new study argues that engineering cultures foster sustainability by adopting assumptions and problem solving practices as part of their identities when designing and building engineering projects This work examines the politics of creating utilizing and modifying Life Cycle Assessment LCA in the construction of renewable energy systems The only volume of its kind ever written it is a must have for any engineer scientist manager or other professional working in or interested in Life Cycle Assessment and its relation to energy systems and impact on environmental and economic sustainability **Implementing**

**a Comprehensive Research Compliance Program** Aurali Dade, Lori Olafson, Suzan M. DiBella, 2015-07-01 The senior research compliance administrator has emerged as a critically important position as universities and other research organizations face an increasingly intricate regulatory environment These administrators are tasked with a special challenge ensuring that their institutions conduct safe ethical and compliant research while also helping researchers understand and meet compliance requirements and achieve their research goals These competing responsibilities can make the role of the research administrator complex however those who serve in this role may find that they have limited preparation for the challenges and little or no formal education in the field Thus the goal of this handbook is to provide practical guidance to research administrators who are responsible for a wide variety of compliance programs Previous volumes on these topics have focused primarily on educating research faculty staff and students An assumption in many of these handbooks is that all additional questions related to research ethics and regulations should be directed to the senior research administrator yet the books have limited guidance intended for the senior research administrators themselves This handbook is designed

therefore to serve as a detailed program implementation manual for these administrators who are expected to be conversant on a broad range of complex ethical and regulatory topics and to provide guidance to those conducting research as well as upper administration and others interested in safe ethical and compliant research

**Bio-polymerized Sulfur for Sustainable Practice in Applied Sciences and Engineering** Abdel-Mohsen O. Mohamed, Maisa El Gamal, 2025-04-10 Bio

polymerized Sulfur for Sustainable Practice in Applied Sciences and Engineering explores innovative approaches in sustainable chemistry by leveraging renewable resources and sulfur as foundational elements for creating sustainable functional materials The book highlights the potential of bio polymeric materials derived from sulfur and renewable sources offering new avenues for environmentally friendly manufacturing Additionally the text delves into lifecycle assessment studies and the principles of a circular economy emphasizing the importance of sustainability in modern engineering The work emphasizes the criticality of sustainable practices highlighting the intersection of bio polymeric materials and circular economy principles ultimately guiding the reader towards a more sustainable future The book also presents an in depth analysis of bio polymerized sulfur s role in promoting sustainable development It discusses how polymerized sulfur can be used to develop engineered products that align with sustainability goals Introduces the basic principles of bio and sulfur polymerization Outlines the methods for conducting lifecycle assessment in the manufacturing of bio polymerized sulfur for use in waste management agriculture ground treatment construction road infrastructures and in the production of high functional materials Contributes to the achievement of the UN Sustainable Development Goals

*Evaluation of PEPFAR's Contribution (2012-2017) to Rwanda's Human Resources for Health Program* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Global Health, Committee on the Evaluation of Strengthening Human Resources for Health Capacity in the Republic of Rwanda Under the President's Emergency Plan for AIDS Relief

(PEPFAR), 2020-05-22 Since 2004 the U S government has supported the global response to HIV AIDS through the President s Emergency Plan for AIDS Relief PEPFAR The Republic of Rwanda a PEPFAR partner country since the initiative began has made gains in its HIV response including increased access to and coverage of antiretroviral therapy and decreased HIV prevalence However a persistent shortage in human resources for health HRH affects the health of people living with HIV and the entire Rwandan population Recognizing HRH capabilities as a foundational challenge for the health system and the response to HIV the Government of Rwanda worked with PEPFAR and other partners to develop a program to strengthen institutional capacity in health professional education and thereby increase the production of high quality health workers The Program was fully managed by the Government of Rwanda and was designed to run from 2011 through 2019 PEPFAR initiated funding in 2012 In 2015 PEPFAR adopted a new strategy focused on high burden geographic areas and key populations resulting in a reconfiguration of its HIV portfolio in Rwanda and a decision to cease funding the Program which was determined no longer core to its programming strategy The last disbursement for the Program from PEPFAR was in

2017 Evaluation of PEPFAR's Contribution 2012 2017 to Rwanda's Human Resources for Health Program describes PEPFAR supported HRH activities in Rwanda in relation to programmatic priorities outputs and outcomes and examines to the extent feasible the impact on HRH and HIV related outcomes The HRH Program more than tripled the country's physician specialist workforce and produced major increases in the numbers and qualifications of nurses and midwives Partnerships between U S institutions and the University of Rwanda introduced new programs upgraded curricula and improved the quality of teaching and training for health professionals Growing the number skills and competencies of health workers contributed to direct and indirect improvements in the quality of HIV care Based on the successes and challenges of the HRH program the report recommends that future investments in health professional education be designed within a more comprehensive approach to human resources for health and institutional capacity building which would strengthen the health system to meet both HIV specific and more general health needs The recommendations offer an aspirational framework to reimagine how partnerships are formed how investments are made and how the effects of those investments are documented *Science* John Michels (Journalist),2010

**Rock Coast Geomorphology** D.M. Kennedy,W.J. Stephenson,L.A. Naylor ,2014-08-20 Rocky landforms dominate large portions of the world's coast Cliffs and shore platforms form spectacular landscapes yet when compared to other landforms they are relatively unstudied with many contemporary controversies dating back to the mid nineteenth century The past decade has seen a reinvigoration of research driven by advances in technology that now enable precise measurements of erosion to the micron scale and quantification of wave energy onto and through cliff edifices to be made as well as being able to directly date rock surfaces In order to integrate this diverse range of research this volume's regional approach first integrates the latest data with longstanding theory and then analyses this research through the boundary conditions that exist in each area The volume brings together the research leaders in the field includes chapters on nearly all the major rock coasts of the world and identifies future research needs **Navigating the Landscape of FAIR Data**

**Sharing and Reuse: Repositories, Standards, and Resources** Maaiké M. H. Van Swieten,Christian Haselgrove,2024-03-08 The huge volume of neuroscience data and the wide variety of data formats generated across different neuroscience communities has posed a challenge to traditional methods of data management data sharing and data mining Mandates on data sharing and the demand for using open data has driven the development of advanced methodologies and tools to effectively explore mine and integrate data However the growing number of resources make it harder for researchers to navigate this landscape Awareness of these tools and resources is vital for effective data mining and unlocking new discoveries The goal of this research collection is to provide an overview of available resources centred around making data findable accessible interoperable and reusable FAIR **The Collaborative Fight** Paul R. Birch,Lina M. Svedin,2024-02-09 The beautiful picture of brothers in arms vanquishing a tyrant The power of a well orchestrated army and navy winning historic battles Overwhelming military might and ability through teamwork This is how the US military services

portray themselves to the public and to their own service members through official doctrine. However, under the veneer of jointness, deeply fraught processes are at play. Frequently, the services think more about protecting organizational turf than about national security and maintaining an advantage against the United States' external adversaries. Uniting US military services is a difficult endeavor that becomes even more so the farther from a battlefield and the higher up the command structure the unifying needs to happen. In *The Collaborative Fight*, Paul R. Birch and Lina M. Svedin examine cases of institutional jointness among US military services from the late nineteenth century into the twenty-first century. They draw actionable conclusions for practitioners in the defense establishment while giving examples of successful joint cooperation that overcame the difficulties inherent in pursuing it. Even the successful cases that Birch and Svedin discuss show that the US military services face bureaucratic incentives and organizational leadership issues that make battlefield cooperation less than ideal. Birch and Svedin adeptly translate theory and history into approaches useful to practitioners in the field while examining the theoretical framework outlining the drivers in joint military cooperation.

Psychology in Social Context Philip John Tyson, Dai Jones, Jonathan Elcock, 2011-09-09. *Psychology in Social Context: Issues and Debates* provides a critical perspective on debates and controversies that have divided opinion within psychology, both past and present. It explores the history of psychology through examples of classic and contemporary debates that have split the discipline and sparked change, including race and IQ psychology and gender ethical issues in psychology, parapsychology, and the nature/nurture debate. It represents a unique approach to studying the nature of psychology by combining historical controversies with contemporary debates within the discipline. It sets out a clear view of psychology as a reflexive human science embedded in and shaped by particular socio-historical contexts. Written in an accessible style using a range of pedagogical features such as self-learning outcomes, self-test questions, and further reading suggestions at the end of each chapter.

**Law Librarianship in the Twenty-First Century** Roy Balleste, Lisa Smith-Butler, Sonia Luna-Lamas, 2013-11-21. *Law Librarianship in the 21st Century* a text for library and information science courses on law librarianship introduces students to the rapidly evolving world of law librarianship. With no prior knowledge of the law required, students using this book will find practical answers to such questions as: What is law librarianship? How do you become a law librarian? How does law librarianship interrelate with the legal world? Individual chapters provide a concise treatment of such specialized topics as the history of law librarianship, international law, and government documents. Standard topics are dealt with as they apply to the law library, including collection development, public services, technical processing, administration, technology, and consortia. The textbook also includes an explanation of the common acronyms and special terminology needed to work in a law library. This new edition updates the text throughout and adds two new chapters.

The Law in War Geoffrey Corn, Ken Watkin, Jamie Williamson, 2018-06-11. This book provides a comprehensive yet concise overview of key issues related to the regulation of armed hostilities between States and between States and non-State groups. Coverage begins with an explanation of the

conditions that result in the applicability of international humanitarian law and then subsequently addresses how the law influences a broad range of operational humanitarian and accountability issues that arise during military operations Each chapter provides a clear and comprehensive explanation of humanitarian law focusing especially on how it impacts operations The chapters also highlight both contemporary controversies in the field and potentially emerging norms of the law The book is an ideal text for students studying international humanitarian law for the first time as well as an excellent introduction for students and practitioners of public international law and international relations

**Spectacular Flops** Michael Brian Schiffer, 2018-12-31 Many technologies begin life as someone s vision of an ambitious perhaps audacious technology that is expected to have a revolutionary impact on consumers whether families companies or societies However if this highly touted technology fails prematurely at some point in its life history it becomes a spectacular flop Employing a behavioral perspective this book presents a sample of twelve spectacular flops encompassing the past three centuries ranging from the world s first automobile to the nuclear powered bomber Because technologies may fail from many different causes spectacular flops pose a special challenge to the author s long term project of furnishing generalizations about technological change Instead of constructing generalizations that apply to all spectacular flops this book provides limited generalizations that pertain to particular groups of technologies bounded by parameters such as long term development projects and one off
